Ru·ma·nia, Rou·ma·nia (ru:méinjə, ru:méiniə) a republic (area 91,671 sq. miles, pop. 22,510,000) in S.E. Europe. Capital: Bucharest. People and languages: 86% Rumanian, 9% Magyar, 2% German, Ukrainian, Gypsy, Yugoslav, Russian and other minorities. Religion: 80% Orthodox, 6% Roman Catholic, 5% Calvinist, 2% Lutheran, small Jewish, Moslem and Protestant minorities. The land is 44% arable, 17% pasture and 27% forest (mainly evergreen). The E. Carpathians (Pietros, 7,568 ft) and the Transylvanian Alps (Negoi, 8,346 ft) cross the country diagonally from north and south meeting in the east center. With the Bihor massif (6,000 ft) in the west they enclose the cultivated Transylvanian plateau (1,000–1,600 ft). The mountains are surrounded northwest, west, south, and east, by the Hungarian, Banat, Walachian and Moldavian plains. The Black Sea coast (Dobruja) is flat. The Danube, cutting through the Transylvanian Alps at the Iron Gate, forms most of the southern border Average temperatures (F.): Bucharest 9° (Jan.) and 72° (July). Rainfall: 10-20 ins in Dobruja, Moldavia and Walachia, 20-30 ins in the west and the central basin, 30-60 ins in the mountains. Livestock: cattle, sheep, hogs, poultry, horses. Agricultural products: cereals, potatoes, root vegetables, tobacco, grapes, plums and other fruit. Fishing is important in the Danube delta and the Black Sea. Mineral resources: oil (esp. Other resources: timber, hydroelectricity Manufactures and industries: iron and steel, mining, machinery, oil refining, shipbuilding, chemicals, paper, cement, sugar, edible oils, textiles, light manufactures, electrical equipment, vehicles. Exports: oil, cement, lumber, tractors, machinery, ships, oilfield and factory equipment, corn, foodstuffs. Imports: iron ore, metals, industrial plant, coke, electric cables, diesel engines. Chief ports: Constanta, Galati. Universities: Iasi (1860), Bucharest (1864), Cluj (1872), Timisoara (1945) Monetary unit: leu (100 bani). HISTORY The region formed the Roman province of Dacia (2nd-3rd cc.), was invaded by Visigoths, Huns, Lombards and Avars (4th-5th cc.) and was settled by Slavs (6th c.) and Bulgarians (7th c.). It became divided (late 13th c.) into the principalities of Moldavia and Walachia, which became vassals of the Ottoman Empire (15th and 16th cc.), were briefly united (early 17th c.) and were involved in the Russo-Turkish Wars. Revolutions were put down (1821) by the Turks and the principalities were occupied (1829-34) by the Russians after the Treaty of Adrianople. More revolutions failed (1848) and the principalities were jointly occupied by the Turks and the Russians. Conflicts over navigation rights on the Danube were a cause of the Crimean War. Moldavia and Walachia formed a personal union (1859) and were officially united as Rumania (1861). Under Carol I constitutional and economic progress was made and, after the Congress of Berlin (1878), the country became an independent kingdom (1881). Rumania gained S. Dobruja after the 2nd Balkan War (1913) and joined the Allies (1916) in the 1st world war, after which it received Transylvania, Bukovina, Banat and Bessarabia. Agrarian reforms broke up most of the large estates, but political chaos weakened the country. Carol II established (1930) a fascist dictatorship, but was deposed (1940) and Antonescu became dictator, supporting the Axis in the 2nd world war. King Michael overthrew Antonescu (1944) and formed an alliance with the Allies. Communists gained a majority (1946), Michael abdicated (1947) and Rumania became a people's republic. It joined the U.N. and the Warsaw Pact (1955); it is also a member of COMECON. It became a socialist republic (1965) but maintains a foreign policy independent of the Soviet Union

Rus·kin (rʌskin), John (1819-1900), English critic and essayist. He made his name as an art critic with the first part of 'Modern Painters' (1843), begun as a defense of Turner. Visits to Switzerland and Italy—esp. to Venice—led to 'The Seven Lamps of Architecture' (1849) and 'The Stones of Venice' (1851-3). 'Modern Painters' continued to appear until 1860. In 1853 Ruskin began his career as a lecturer, mainly on art but later also on economic, social and general cultural subjects. 'Sesame and Lilies' (1865) was the most popular collection. Later works include 'Fors Clavigera' (1871-84), a series of letters to the working men of England, and 'Praeterita' (1885-9), his autobiography. He was a profound critic of art, and his range was wide, though he had little sympathy for 'advanced' contemporary work. He was also a profound social critic, emphasizing the distinction between mere wealth and true social welfare, and between mechanical labor and craftsmanship. Like Dickens and Morris, he laid his finger on the defects of the new industrial society
Rus·sell (rʌs'l), Bertrand, 3rd Earl Russell (1872-1970), British philosopher. His 'Principles of Mathematics' (1903) led to 'Principia Mathematica' (1910-13, in collaboration with Whitehead), a research into symbolic logic. Rus·sia (rʌʃə) a former country of E. Europe and Asia which developed out of the grand duchy of Moscow, and which became (1917) the Union of Soviet Socialist Republics. The name is loosely used for the U.S.S.R., but is properly applied only to the R.S.F.S.R., esp. the European part. HISTORY. The Scythians, inhabiting the steppes from before the 7th c. B.C., were displaced (3rd c. B.C.) by the Sarmatians. The steppes were successively invaded by the Goths (3rd c. A.D.), the Huns (4th c.) and the Avars (6th c.). The Khazars established an empire in the southeast (7th–early 11th cc.) and the Bulgars founded a state (8th-13th cc.) in the region of the Volga. The Eastern Slavs settled in the Ukraine (c. 9th c.). A Russian state originated in the conquests (9th c.) of the Varangians, Viking warriors who established their capital at Kiev. Greek Orthodox Christianity became the official religion (c. 988). Trade with Scandinavia, Byzantium and the Middle East prospered but, after the attacks of the Cumans (11th c.), Kiev declined (12th c.). Russia was overrun (1237-40) by the Golden Horde and under the rule of the Tatars Moscow emerged as the dominant principality (14th c.). During the reign (1462-1505) of Ivan III, Novgorod and much of N. Russia were conquered, and Moscow asserted its independence against the Tatars (1480). Ivan IV's reign (1533-84) brought conquests in the lower Volga, extending Muscovite territory south to the Caspian. Ivan took the title of czar, established an autocracy, and did much to reduce the power of the boyars. Boris Godunov seized power on the death (1598) of Ivan's weak-minded son, and faced the opposition of the boyars and the Cossacks, and the threat of pretenders to the throne. Disorder followed Godunov's death (1605) and Sigismund III of Poland, in alliance with the boyars and the Cossacks, occupied Moscow (1610-12). After a national uprising (1612), Michael Romanov was elected czar (1613). Order was restored but, despite the growth of trade with the West, Moscow remained largely isolated from Europe. Colonization began to spread toward the Pacific. The nobles' rights over the serfs were increased, until serfdom was little better than slavery (17th c.). The rule of the czars became even more absolute. Peter I, who had traveled widely in Europe, began to westernize and modernize the country during his reign (1689-

1725). The army was reorganized and a navy founded. The Church was made subject to the State, and the capital was moved from Moscow to St Petersburg (1713). The upper classes were forced to adopt Western clothes, and educational institutions were founded on Western lines. The Northern War (1700-21) resulted in the acquisition of Livonia and other Baltic territories. The Russo-Turkish Wars enabled Russia to expand toward the Balkans. After Peter's death (1725), Russian participation in European affairs continued to increase. Russia supported Austria in the War of the Polish Succession (1733-5) and, under Elizabeth, fought Prussia in the Seven Years' War (1756-63). During the reign (1762-96) of Catherine II, Russia became a leading European power, gaining vast territories in the partitions of Poland (1772, 1793, 1795), by the Treaty of Kuchuk Kainarji (1774), and by the annexation of the Crimea (1783). After a rising of Cossacks and serfs (1773), the central autocracy was strengthened. Under the influence of the French Enlightenment, literature and the arts flourished. Catherine's son and successor, the mentally unstable Paul I, was assassinated (1801), and succeeded by Alexander I. Russia opposed France in the Napoleonic Wars, but was forced to make peace at Tilsit (1807). Russian territory expanded with the acquisition of Finland (1809), Bessarabia (1812) and Caucasia (1813). Russian reluctance to adhere to the Continental System led to an unsuccessful Napoleonic invasion (1812). Russia took a leading part in the Congress of Vienna (1814-15) and in the establishment of the reactionary Holy Alliance (1815). On Alexander's death (1825), the liberal Decembrist movement failed in its attempt to prevent his brother Nicholas I from succeeding to the throne, and a period of repression began. Russian troops put down risings in Poland (1830-1) and revolution in Hungary (1848-9), but Russia's attempt to extend its influence toward Constantinople met with a severe defeat in the Crimean War (1853-6). This was followed by a period of liberal reform during the reign (1855-81) of Alexander II. The serfs were emancipated (1861), but agrarian conditions failed to improve. The courts were reformed, and a limited form of self-government was provided by the introduction of zemstvos (1864). Under Gorchakov, Russia's foreign policy concentrated on expansion into Caucasia and central Asia, but renewed attempts to expand at the expense of Turkey were crushed at the Congress of Berlin (1878). The late 19th c. saw rapid industrial progress as the construction of railroads enabled Russia's vast resources to be brought into use. Siberia was opened up by the Trans-Siberian Railroad, begun in 1891. A Populist conspiracy resulted in the assassination (1881) of Alexander II, but his successor, Alexander III, proved more reactionary. Increasing rivalry led to the Russo-Japanese War (1904-5). Marxist doctrines spread among the small but rapidly growing urban proletariat, and a revolution broke out (1905) in St Petersburg, spreading to the Black Sea fleet. It was followed by a series of strikes and peasant riots, and by the formation of soviets. Police repression included pogroms of the Jews. The czar granted a measure of parliamentary government by creating a duma, but its meetings were dissolved when it opposed the regime. Stolypin brought in belated agrarian reforms to distribute land to the peasants. Russia allied with France and Britain in the Triple Entente. Russian support of Pan-Slavism contributed to the outbreak of the 1st world war, which Russia entered very ill-prepared. Its first offensive against the Germans was halted at Tannenberg (Aug. 1914) and a series of reverses followed, with heavy casualties. Popular feeling turned against Nicholas II and his court. A revolution took place in Petrograd and spread throughout the country (Feb. 1917), the duma assumed real power, and the czar was forced to abdicate (Mar. 15, 1917). A provisional government was organized under the leadership (July-Nov. 1917) of Kerenski. This was overthrown (Nov. 7, 1917) by the Bolsheviks, led by Lenin, who had been allowed to return to Russia by the German government. The dictatorship of the proletariat was announced, and Russia went out of the 1st world war under the humiliating terms of the Treaty of Brest-Litovsk (1918). Sa·u·di Arabia (saudi:, saudi:, sɔdi:) a kingdom (area approx. 600,000 sq. miles, pop. approx. 9,795,000, 50% Beduins) occupying most of Arabia and comprising the former kingdom of Hejaz (capital: Mecca) and former sultanate of Nejd (capital: Riyadh), with their dependencies. It has joint control with Iraq over 7,000 sq. miles and with Kuwait over 5,770 sq. miles of neutral territory. Language: Arabic. Religion: Islam (official), mainly Sunnites (Wahhabi sect in Nejd), with a Shi'ite minority in al-Hasa. It is largely an arid plateau (1,500–6,000 ft), with a lowland strip along the Red Sea coast and a wider plain along the Persian Gulf and in the southeast. Mountains between the western coastal strip and the interior rise to 5,000 ft north of Jedda and to 9,000 ft south of Mecca (highest in Asir). The Nafud and Great Sandy deserts occupy the northern center and the southeast. The rest of the country has seasonal vegetation. Average temperatures Jan. and July (F.): Jedda 70° and 90°, Riyadh 60° and 80°. Rainfall: 10 ins in oases, 4 ins and under elsewhere. Exports: crude and refined petroleum (the country contains 10% of known world deposits). Other industries: oasis farming (dates and other fruits, cereals), livestock raising (camels, horses, donkeys, sheep), the Mecca pilgrimage trade, building materials, food processing. Imports: piece goods, cereals, foodstuffs, vehicles, building materials, machinery, chemicals. Communications: chiefly by air services or by camel caravan. Ports: Dammam and Ras Tanura on the Persian Gulf, Jedda on the Red Sea. The trans-Arabian pipeline connects the oil fields with the Mediterranean. Universities: Riyadh, Mecca and Medina. Monetary unit: rial (20 qurush). HISTORY (For early history *ARABIA) Hejaz and Nejd were united (1925) as a result of the Wahhabi conquest under ibn Saud, and adopted the name of Saudi

Arabia (1932). Vast oil reserves were discovered (1930's) and were developed by an American firm. Saudi Arabia joined the U.N. and the Arab League (1945) and formed a military, economic and political alliance with Jordan (1965). Saud, son of ibn Saud, ruled the country (1953-64), and was succeeded by Faisal. Profits from the oil industry made possible improvements in irrigation, education and communications. Faisal was assassinated (1975) and was succeeded by Khalid, who ruled until his death (1982) and was succeeded by Crown Prince Fahd. Saudi Arabia acts as a 'conservative' force in the Middle East and is a leader of OPEC.

It sought to resolve the conflicts of faith and reason and of nominalism and realism, and to establish proof of the existence of God. St Augustine of Hippo, in seeking to reconcile Platonic thought and Christian dogma, had stressed the illumination of faith by reason. The philosophical implications of Christianity were actively explored in Europe from the 11th c. onwards, notably by Anselm and Abelard. The debate was increased by the arrival (12th c.) in the universities of the work of Aristotle through the Arabian commentators Avicenna and Averroes. The Averroist doctrine that faith and reason might not be complementary brought Aristotelianism into disrepute until St Thomas Aquinas powerfully vindicated it in his 'Summa theologica', separating philosophy and theology and exploring the relationship between them. Other defenders of Aristotle were St Albertus Magnus and St Bonaventura. Thomism was opposed notably by Duns Scotus and William of Occam. Scot·land (skɒtlənd) a country (area 30,405 sq. miles, pop. 5,130,735) occupying the north of Great Britain. It is a division of the United Kingdom. Capital: Edinburgh. Largest town: Glasgow. Language: English, with 1.5% also speaking Gaelic. Church membership: 25% Church of Scotland (Presbyterian), 15% Roman Catholic, with Nonconformist and Church of England minorities. The educational, judicial and financial systems retain many distinctive features. The land is 17% arable, 8% pasture, 16% forest, and much of the rest is rough grazing land. It is divisible into three natural zones: the Highlands, the Lowlands and the southern uplands. The Highlands in the north (1,000–over 4,000 ft, highest point: Ben Nevis, 4,406 ft) are a rocky, sparsely inhabited mountainous plateau (⁺CAIRNGORM MTNS, ⁺GRAMPIANS), largely moorland, with a coastline deeply indented, esp. in the west, by firths. The Lowlands in the center are comprised mostly of the Forth and Clyde valleys (coal and iron fields, dairy pasture) and contain most of the industry and population. The southern uplands, a rolling moorland (mainly 800–2,000 ft), are cut by small fertile river valleys. Scotland has about 800 islands, including the Orkneys, Shetlands and Hebrides, and hundreds of lakes. Average temperatures (F.): (Jan.) 40°, (Jul.) 56°. Rainfall: under 30 ins along the east coast, over 80 ins along the west coast. Chief ports: Glasgow, Greenock, Leith, Aberdeen. Universities: St Andrews (1411), Glasgow (1451), Aberdeen (1494), Edinburgh (1582), Strathclyde (1964). HISTORY. The earliest inhabitants of Scotland are thought to have been of Iberian stock, and to have mingled with invading Celts (7th c. B.C.). The Romans, who named the northern part Caledonia and its inhabitants Picts, conquered the south (c. 80 A.D.) under Agricola, but were forced to withdraw behind Hadrian's Wall (early 2nd c.). The Scots, a Celtic tribe from Ireland, settled in the west (early 6th c.) and conquered the southern Picts (9th c.). The east coast was raided by Germanic tribes (4th and 5th cc.) and formed part of Northumbria. After the Roman evacuation of Britain, a Romanized British kingdom was left in Strathclyde on the west coast. St Columba brought Christianity to the Picts (6th c.). The Scots, under Kenneth I, defeated the Picts (c. 841) and established a kingdom covering most of Scotland. He and his successors were involved in warfare with raiding Vikings, with Northumbria and with Strathclyde until the 10th c. Norse kingdoms were established in the Hebrides until 1266 and in Orkney and Shetland until 1472. During the reign (1057-93) of Malcolm III and his wife, St Margaret, the Scottish Church was reorganized. Feudalism was introduced in the Lowlands, while the Highlands maintained the clan system (11th c.). Scotland remained united despite sporadic wars with England caused by Norman claims to sovereignty over Scotland and by the intervention of David I in the war between Matilda and Stephen. Scotland became the feudal vassal of England (1174-89). A disputed succession to the throne (1290) enabled Edward I of England to intervene on behalf of John de Baliol, but when Baliol formed an alliance with France (1295) Edward deposed him (1296) and proclaimed himself king. The Scots revolted under Wallace and under Robert the Bruce, who claimed the throne (1306), defeated Edward II at Bannockburn (1314), and gained recognition of Scottish independence (1328). On the death (1371) of David II, Robert II became king, founding the Stuart dynasty. During the Hundred Years' War the Scots supported the French against the English. Scotland was weakened by baronial feuds and was heavily defeated at Flodden Field (1513), when James IV attempted to invade England. During the regency (1554-60) of Mary of Guise, many of the nobility became converted to Protestantism as a result of the work of Knox, and political and religious issues forced Mary Queen of Scots to abdicate (1567) in favor of her Protestant son, James VI. The latter inherited the throne of England (1603) as James I, by virtue of his descent from Margaret Tudor. The union of the two thrones remained a personal one, Scotland maintaining its own institutions and its Presbyterian religious tradition. Charles I's attempt to force the English liturgy on the Presbyterian Scots provoked the formation (1638) of the National Covenant and the outbreak of the Bishops' Wars (1639 and 1640). The Covenanters supported Cromwell in the English Civil War, but Cromwell's forced union of England and Scotland (1654) caused much resentment among the Scots, and a personal union was resumed at the Restoration. The religious policy of Charles II and James II was unpopular in Scotland. To guarantee the Hanoverian succession, Scotland and England were united by the Act of Union (1707), under which Scottish representatives would sit in the British parliament, but Scotland would keep its own laws and the Presbyterian Church. Scotland remained a center of the Jacobite cause until the mid-18th c. (For subsequent history ⁺GREAT BRITAIN)

He and his four companions died on the return journey.

Scott, Sir Walter (1771-1832), Scottish poet and novelist. His work displayed his passion for the history of his country. His narrative poems, e.g. 'The Lay of the Last Minstrel' (1805), 'Marmion' (1808) and 'The Lady of the Lake' (1810), were immensely popular. The novel *Waverley* (1814) was the first of a long series, published anonymously, including 'The Heart of Midlothian' (1818), 'Ivanhoe' (1820) and 'The Talisman' (1825). His influence can be traced in all romantic art of the early 19th c. which took balladry and folklore as its theme.

Scott, Winfield (1786-1866), U.S. general, and Whig candidate for the presidency in 1852. As general officer commanding (1841-61) the U.S. Army, he won several victories during the Mexican War, notably at Veracruz, Cerro Gordo, and Chapultepec, by which he forced (1858) Mexico's surrender.

Shake·speare (ʃeikspiər), William (1564-1616), the greatest English poet and playwright. He was born and died at Stratford-upon-Avon. He was in London as actor, poet and playwright (with occasional visits to his home town) from about 1592 to about 1616, but there is a gap of 8 to 10 years before 1592 concerning which scarcely anything is known

His greatest period was between 1600 and 1607, during which he produced the comedies 'As you Like It' and 'Twelfth Night' (1600-1), the tragedies 'Hamlet' (1602-3), 'Othello' (1604), 'King Lear' (1605-6), and 'Macbeth' (1606) as well as 'Antony and Cleopatra' (1607-8) and at least four other plays. The 'Sonnets' date from 1609

Various ages have found various things in Shakespeare. The 18th c. saw in him 'just observation of general nature' (Johnson) or truth-to-life. The Romantics admired his freedom from literary convention, the sweep and grandeur of historical conflict, his parabolic insight into the extremes of the human predicament. The later 19th c. (e.g. Bradley) admired the delicate and complicated psychological insight of his characterization. All ages have admired his command of language, and our own age has presented a picture of Shakespeare as a conscious symphonic artist, producing in his greatest plays an elaborate structure in which theme answers theme and in which the whole, like music, is its own meaning, which any paraphrase denatures. He is presented by modern critics as deeply concerned with the moral basis of life. 'Nature', 'right', 'order', 'truth', the key concepts, are as it were both created and tested in the conflicts which form the plays

—A sufficiently large and sudden cooling of the air at some height above the ground can cause the water vapor to pass directly into the solid state in the form of small hexagonal ice crystals, without first liquefying. Since the vapor pressure of ice is low, these suspended crystals grow by accretion, in aggregates of small crystals which have regular geometrical patterns of structure (snowflakes), until their mass causes them to fall through the air and they are deposited on the ground. The air trapped between the small crystals of these aggregates causes internal reflection of light at the crystal surfaces, giving snow a sparkle and a pure white color. The air trapped in this way, and between the flakes themselves as they settle, makes the deposit of snow a very bad conductor of heat. The ground, and its animal and plant life, are thus protected from further loss of heat by radiation. The conversion of vapor into solid also releases latent heat, causing an appreciable rise of air temperature

Soc·ra·tes (sɔkrəti:z) (c. 470-399 B.C.), Greek philosopher of Athens. Most of his mature life was devoted to philosophy although he developed no formal doctrine, founded no school and wrote nothing. His life, thought and method are known to us chiefly through Plato and Xenophon. He was familiar with the natural philosophers but they dissatisfied him by their lack of interest in human conduct. He studied the methods of the Sophists but attacked them for their indifference to virtue. He himself held that virtue is understanding and that no man knowingly does wrong. A strong patriot, he believed that a citizen is bound by conscience to obey the laws of the state. Thus, when (at the age of 70) he was imprisoned and condemned to death for irreligion and for corrupting the young men of Athens, he made no attempt to escape, despite the entreaties of his friends. More than any other philosopher, Socrates lived his philosophy. Several divergent schools of thought looked to him as their founder, and he has been widely regarded as the type and embodiment of the philosopher

HISTORY South Africa was inhabited by Bushmen and Hottentots when Dias discovered the Cape of Good Hope (1487). After Vasco da Gama rounded the Cape (1497), South Africa became important as a supply station on the route to the East Indies. The Dutch East India Company established a settlement at Cape Town (1652). Settlement extended inland to form Cape Colony (18th c.), giving rise to many wars with Bantu tribes (18th-19th cc.). The colony prospered with slave labor, largely imported from the Dutch East Indies. Britain annexed the colony (1806) to protect its route to India, an act officially recognized by the Netherlands in 1814. Increasing numbers of British settlers arrived (1820s), and to escape British domination the Boers moved northward in the Great Trek (1835-6) to Natal, the Transvaal and the Orange Free State, defeating the Zulus (1838). Britain annexed Natal (1843) but recognized the independence of the Transvaal (1852) and the Orange Free State (1854). Relations between the British colony and the Boer republics deteriorated, esp when Britain annexed (1871) Griqualand, an area of the Orange Free State where diamonds had been discovered (1867). An attempt to annex the Transvaal (1877) resulted in war between Britain and the Boers (1880-1) in which Britain was defeated, and the Transvaal's independence was recognized. But the discovery (1886) of gold at Witwatersrand brought many new immigrants, known as Uitlanders, to the Transvaal. Kruger's refusal to give them the franchise and the Jameson Raid (1895) provoked the Boer War (1899-1902). After the British victory, the Transvaal and the Orange Free State became British colonies (1902) and were united with Cape Province and Natal to form the Union of South Africa (1910). Led by Botha and Smuts, South Africa fought Germany in the 1st world war and received German South West Africa as a mandate (1920). In opposition to Smuts's policy of promoting cooperation between the British and Boer elements, the Nationalist party was formed, advocating Boer supremacy and secession from the Commonwealth. Despite Nationalist opposition, South Africa took an active part in the 2nd world war. The Nationalists came to power (1948) under Malan, put apartheid into practice, and virtually annexed South West Africa (1949). European supremacy was enforced by government control of electoral districts and the judicature and by strict segregation of residential areas and educational establishments. Amid mounting pressure from other African states, the U.N. and the Commonwealth to abandon apartheid, South Africa withdrew from the Commonwealth, as a republic (May 31, 1961). The U.N. terminated [illegible] date over South West Africa (Namibia), but South Africa described this as illegal and continued its administration. Between 1964 and 1985 some 3.5 million blacks were resettled into ten African 'homelands,' four of which, Transkei (1976), Bophuthatswana (1977), Venda (1979) and [illegible] independence by South Africa, although no other country recognized [illegible]. Opposition to apartheid in South Africa grew, intensifying in 1976 when rioting broke out in several cities, including Soweto, a black township of Johannesburg. The death while in police custody of Stephen Biko, a young black detained in a government crackdown following the riots, caused international protests. Under pressure the government began to amend some apartheid laws from 1978, and in 1984 Coloureds and Asians were offered a limited role in the central government, although blacks were [illegible]. Bishop Desmond Tutu, head of the South African Council of Churches, received the Nobel peace prize (1984) for [illegible] to end racial discrimination and to apartheid. Violence continued, however, leading the government to declare a state of emergency (1985-6) and to grant blacks a few concessions. Some of South Africa's trading partners imposed limited sanctions on South Africa to increase pressure on the government. South Africa continued to exert control over Namibia, despite continuous international pressure.

O.F. *espace*]

—Space is the idea which each person forms and develops, as the result of his sense perceptions, that there exist 'things' other than himself, and that his own body consists of 'parts', and that these bear an orderly relationship to one another which he describes in terms of position in space and distance from one another. Experience associates with this idea the quality of being the same always, and thus the idea of time is also involved. The interrelationship of space and time as a condition of being is treated mathematically in the study of the space-time continuum. The idea 'space', like the idea 'time', is a relative concept, since it is based solely upon sensory experience

space exploration the exploration of space by instrumented and manned spacecraft from 1957. When the Soviet Union's 'Sputnik I' with cosmonaut Yuri Gagarin aboard was successfully launched and orbited the earth (1957), the Space Age had begun and the U.S.A. formed the National Aeronautics and Space Administration (NASA) (1958). The Mercury program saw John Glenn rocket into space (1962) in 'Friendship 7'; the Gemini program produced the first walk in space (1965) by Edward H. White; and the Apollo program sent Neil Armstrong, Edwin Aldrin and Michael Collins to the Moon (1969). As a cooperative venture a Soviet Soyuz spacecraft and an American Apollo spacecraft docked in space in 1975. By 1981 the space shuttle was in operation, but flights were suspended temporarily when 'Challenger' exploded (1986) (*SPACE SHUTTLE). Unmanned space exploration saw Earth satellites, lunar probes and interplanetary probes studying the Earth's radiation belts, atmosphere and ionosphere, as well as other planets (1962-) including Mercury, Venus, Mars, Jupiter, Saturn and Uranus

spacelab laboratory and workshop built by 10 European countries, all but one members of the European Space Agency, for the U.S. space shuttle. Begun in 1973, it consists of two adaptable modules—one a laboratory, the other a flat platform on which equipment can be exposed directly to space. Spacelab is carried in the cargo bay of the shuttle and is used to conduct various experiments. Its first flight aboard a space shuttle was in 1983

Spain (spein) a state (area incl. the Balearic [illegible] 37,746,260) of S.W. Europe, occupying most of the Iberian Peninsula. Capital: Madrid. Overseas possessions: Ceuta, Melilla and small offshore islands. Language: Spanish, with Catalan, Basque and Galician minorities. Religion: Roman Catholic, with 26,000 Protestants, 1,000 Jews. The land is 32% arable, 50% pasture and grazing, and 8% forest. The core of Spain is the dry, deforested central Iberian plateau, or Meseta (mainly 1,500-3,000 ft), divided into [illegible] Old Castile and Leon and [illegible] (New Castile and Estremadura) by the Sierra de Gredos (to 8,504 ft) and Sierra de Guadarrama, west and north of Madrid. The Meseta is bordered on the north, northeast and south by the Cantabrian Mtns, Iberian Mtns and Sierra Morena. Outside the Meseta lie the wooded hills of Galicia, the Pyrenees and Catalonian Mtns (separated from the Iberian Mtns by the Ebro basin) and the Andalusian ranges (Mulhacen, 11,420 ft), separated from the Sierra Morena by the Guadalquivir. Intensive agriculture is largely confined to the well-watered coastal strips (where industry is also concentrated) and the valleys of the Ebro, Douro, Tagus, Guadiana and Guadalquivir. The center (where large estates predominate) is mainly devoted to stock raising and cereals. Irrigation projects are under construction. Average temperatures (F.): (Jan.) south coast and Andalusia over 50°, other coasts 42°-50°, central Spain 36°-42°, mountains under 36°, (July) Alicante and Andalusia over 80°, S. Spain and Ebro basin 72°-80°, N. Spain and southern mountains 64°-72°, northern mountains, incl. Galicia, under 64°. Rainfall: N. Meseta, Ebro basin and Murcia under 16 ins, Galicia, Asturias and Basque coast over 30 ins. Livestock: sheep, goats, cattle, hogs, mules, donkeys, horses. Agricultural products: cereals, olives, oranges, potatoes, rice, vines, onions, lemons, almonds and raisins, esparto, flax, hemp, pulses, silk, tobacco, sugarcane, sugar beets, cotton. Forest products: cork, pine lumber, resin, eucalyptus. Mineral resources: coal, iron ore, iron pyrites, copper, lead, mercury, manganese, potash, salt, tin, zinc, wolfram, ilmenite, silver, gold, quartz, sulfur, titanium, cobalt, nickel, bismuth, antimony. Industries: mining, iron and steel, textiles, fishing, machinery and chemicals, fertilizers, explosives, paper, aluminum, shipbuilding, foodstuffs, wine, sugar, cork, oil refining, cement, vehicles, hydroelectricity, tobacco, footwear, pottery, glass, leather, tourism. Exports: vegetable products, foodstuffs, wine, tobacco, minerals, fats and oils, metals, textiles. Imports: minerals and metals, machinery, vehicles, cotton, foodstuffs, chemicals. Ports: Cádiz, Barcelona, Bilbao. There are 13 universities, the oldest being Salamanca (c. 1230). Monetary unit: peseta (100 céntimos). HISTORY There is much evidence, notably the cave paintings at Altamira, of Stone Age habitation in Spain. Celts invaded (1st millennium B.C.) and mingled with the native Iberians. Colonies were established in Andalusia by the Phoenicians (11th c. B.C.) and on the east coast by the Greeks (6th c. B.C.). The Carthaginians under Hamilcar Barca conquered Spain (3rd c. B.C.) but were expelled by the Romans after the 2nd Punic War (218-201 B.C.). Roman control was established over the whole peninsula by the 1st c. A.D., the economy prospered, and Christianity was introduced. Spain was a center of Roman culture, and produced Seneca, Lucian, Trajan, Hadrian, Martial and Quintilian. It was overrun (5th c.) by the Vandals and the Visigoths, under whom a legal code was evolved and ecclesiastical learning flourished, notably with Orosius and Isidore of Seville. The Moors overran [illegible] and Catalonia became a splendid center of the Umayyad caliphate (756-1031). Irrigation works were constructed, new crops were introduced and crafts and trade flourished. Portugal became an independent kingdom (1143). Spain was gradually reconquered by the Christians, working first from Asturias, and then from the new kingdoms of León, Navarre, Castile and Aragon. These kingdoms merged by conquest and marriage, culminating in the union (1479) of Castile and Aragon. Ferdinand V and Isabella I [illegible] the Moors from Granada, their last stronghold [illegible] America for Spain, and Spaniards explored Indies and South America (16th c.), building up a vast empire which yielded great quantities of gold. The Inquisition was introduced (1478), the Jews were expelled (1492), with severe consequences for Spanish commerce, and the Moors were forcibly converted to Christianity (16th c.) and expelled (1609). Spain was victorious in the Italian Wars (1494-1559) and reached the height of its power under its first Hapsburg ruler, Emperor Charles V. His son, Philip II, inherited the Kingdom of the Two Sicilies, the Netherlands, Sardinia, Milan and Franche-Comte as well as Spain and its colonies. Portugal was under Spanish rule (1580-1640). The northern provinces of the Netherlands rebelled successfully (1581), and Spain was involved in protracted warfare in the southern provinces until 1648 (*THIRTY YEARS WAR). Spain defeated the Turkish fleet at Lepanto (1571) but failed in its attempt to invade England with the Armada (1588). The treaties of Westphalia (1648) and the Pyrenees (1659) were unfavorable to Spain, and the Spanish decline was hastened by the War of Devolution and the War of the Grand Alliance. The death (1700) of Charles II without direct heir, and the rivalry of Austria and France, provoked the War of the Spanish Succession. The resultant Peace of Utrecht (1713) deprived Spain of its European possessions and transferred Gibraltar to British rule. The attempts of Philip V and Alberoni to regain these losses were defeated by the Quadruple Alliance (1720). Under Bourbon rule (1700-1931), Spain entered the Family Compacts with France and regained (1734) the Two Sicilies in the War of the Polish Succession. By the Treaty of Paris (1763), Spain gained Louisiana and lost Florida. It regained the latter by the Treaty of Paris (1783), and sold it to the U.S.A. (1819). During the reign (1759-88) of Charles III, Floridablanca carried out much-needed economic reforms, but the expulsion (1767) of the Jesuits had an adverse effect on education. Spain was involved in the French Revolutionary Wars and the Napoleonic Wars, was forced to accept Joseph Bonaparte as king (1808), and was devastated during the Peninsular War. Ferdinand VII was restored (1814) under a constitutional regime, but his reactionary rule led to the loss of the Latin American colonies and an unsuccessful revolution (1820). His daughter, Isabella II, was deposed after a reactionary reign (1833-68), and disorder broke out, with fighting between Carlists and republicans. Under Alfonso XIII (1886-1931), the Spanish-American War resulted in the loss of Cuba, Puerto Rico and the Philippines (1898). Primo de Rivera brought off a coup d'état (1923) and established a military dictatorship (1923-30). The growth of republicanism resulted in the overthrow of the monarchy (1931). The ensuing republic was strongly anticlerical and hostile to the landowners, and was overthrown by the Falangists under Franco in the Spanish Civil War (1936-9). Franco established a Fascist dictatorship (1939) and kept Spain neutral in the 2nd world war though friendly to the Axis powers. The Falange was declared the only legal party, Church property and privileges were restored, and Spain was declared a monarchy (1947) with Franco as regent for life. The U.S.A. supplied much economic and technical aid (1950s). Spain joined the U.N. (1955) and the Organization for European Economic Cooperation (1959). The Spanish government renewed its claim to Gibraltar (1964) by imposing frontier restrictions. The Cortes approved (1969) General Franco's proposal that on his [illegible] Juan Carlos become [illegible] did (1975). Under a 1978 constitution Spain became a hereditary, constitutional monarchy. An attempted military coup (1981) was [illegible] haments gave the regions more autonomy. Basque separatist groups demanded greater self rule

spa·tial, spa·cial (spéiʃəl) *adj.* of or relating to space **spa·tial·ly, spa·cial·ly** *adv.* [fr. L. *spatium* space]

spatial summation the total effect of [illegible] from different sources converging simultaneously at a sensory receptor

spat·ter (spætər) **1.** *v.t.* to project (a fluid, e.g. water, mud etc.) in drops, *the wheels spattered the mud on all sides* ‖ to project drops of a fluid onto, *the car spattered him with mud as it passed* ‖ *v.i.* to fall in drops, *the rain spattered down* **2.** *n.* a short fall of rain etc., the act or sound of spattering ‖ a spot caused by this [prob. fr. Du. or L.G. *spatten*, to burst]

spat·ter·dash (spætərdæʃ) *n.* (*hist.*) a long legging or gaiter worn as a protection from mud ‖ roughcast

spatter glass a glass of mixed colors resembling an amalgam of the day's scraps in a factory, used decoratively *also* end-of-day glass

spat·u·la (spætʃulə) *n.* an instrument with a broad, flexible, usually dull-edged blade, used for mixing, scooping or spreading soft substances such as paint etc ‖ (*med.*) an instrument used in the examination of certain parts of the body [L. dim. of *spatha*, broad blade fr. Gk]

spat·u·late (spætʃulit) *adj.* with a broad rounded end, *a spatulate table leg* ‖ markedly broad at the tip, *spatulate fingers* (*bot.*) spoon-[illegible] [fr. Mod. L. *spatulatus*]

spav·in (spævin) *n.* a disease of the hock in horses, marked by a bony enlargement caused by strain ‖ this enlargement **spav·ined** *adj.* [fr. O.F. *espavain*]

spawn (spɔn) **1.** *n.* the mass of eggs deposited by fish, bivalve mollusks, batrachians and some other aquatic animals ‖ the mycelium of some fungi, esp. of cultivated mushrooms **2.** *v.t.* to produce (spawn) ‖ (*pop.*) to produce (something, e.g. books) in great numbers ‖ *v.i.* to deposit spawn ‖ (*pop.*) to produce young in great numbers [fr. A.F. *espaundre*]

spay (spei) *v.t.* to remove the ovaries of (an animal) [fr. A.F. *espeier*]

speak (spi:k) *pres. part* **speak·ing** *past* **spoke** (spouk), *archaic* **spake** (speik) *past part.* **spo·ken** (spóukən), *archaic* **spoke** *v.i.* to utter words with the ordinary voice, *he speaks clearly* ‖ to talk, *she was too upset to speak* ‖ to make a speech, *I am going to speak at the meeting* ‖ (with 'about') to discuss, *we spoke about the need for economy* ‖ (with 'about') to rebuke or reprimand, *will you speak to her about her laziness?* (*rhet.*) to sound, *the organ spoke* ‖ (*rhet.*) to be expressive of opinions, ideas, emotions etc., *his face spoke of suffering*, *v.t.* to express (an idea) by speaking, *she spoke the truth* ‖ to use (a language) in speaking, *he can speak German* ‖ to utter orally ‖ to express (opinions, ideas, emotions etc.) without using words, *her eyes and smile spoke a warm welcome* (*naut.*) to communicate with (a ship), *he spoke to S.S. Orontes* **so to speak** if the expression is admissible **to speak for** to recommend, *I hope you will speak for him* to reserve, *this table is spoken for* **to speak of** to mention, *he was speaking of you yesterday* ‖ (usually in negative constructions) of any significance, *he has no problems to speak of* [illegible] **to speak out** (or **up**) to speak openly and with conviction, *she always speaks out against injustice* **to speak up** to speak rather loudly, to raise the voice, *you must speak up if you are to be heard* **to speak well of** (or **for**) to be favorable evidence of, *it speaks well of his good nature that he took no offense* [O.E. *sprecan*, later *spe-*[illegible]

speakeasy [illegible] (*pop. hist.*) a place where alcoholic drink was sold illegally (esp. associated with Prohibi-[illegible]

speak·er (spi:kər) *n.* someone who speaks ‖ someone who makes a speech, gives a talk etc ‖ [illegible] the U.S. House of Representatives, the British House of Commons, and of certain other legislative bodies

[illegible] ing microphone and speaker often attached to a telephone, permitting all within range to listen and speak over the system to which it is attached

speak·ing (spi:kiŋ) **1.** *adj.* (of a likeness) close, [illegible] quent, vivid, *a speaking glance* ‖ involving speaking or talking, esp. as opposed to singing, *his speaking voice is low pitched, she took the only speaking part in the opera* **2.** *n.* the act of [illegible] of the words [illegible] bing weapon consisting of a long shaft with a pointed blade ‖ a similar weapon for stabbing fish **2.** *v.t.* to pierce with a spear, or as if with [illegible]

spear *n.* (*bot.*) a pointed shoot of grass or wheat etc ‖ a sapling [var. of SPIRE]

spear·head (spiərhed) **1.** *n.* the pointed head or blade of a spear ‖ the foremost person, or body of troops, in an attack ‖ the most forceful element, *the spearhead of the opposition* **2.** *v.t.* to be the vital thrusting force of, *he spearheaded the opposition* ‖ (*mil.*) to precede in (an attack or advance)

spear·ing (spiəriŋ) *n.* (*hockey*) an illegal jab

spear·man [illegible] **spear·men** [illegible] mən) *n.* a warrior armed with a spear

spear·mint (spiərmint) *n. Mentha spicata*, fam. *Labiatae*, common garden mint It yields the essential oil, carvone

spec (spek) *n.* (*Br.*, *pop.*) a commercial speculation on spec [illegible] will turn out as one wishes but without certainty that they will [short for SPECULATION]

spe·cial (speʃəl) **1.** *adj.* particular in kind, *each spice imparts a special flavor* ‖ superior, *a special brand* ‖ serving a particular purpose, *a special tool* ‖ specialized, *it requires special knowledge* ‖ (of friends) intimate, close **2.** *n.* a train run in addition to the scheduled trains, for a special occasion ‖ a special edition of a newspaper ‖ a special offer for some regularly stocked item, e.g. of food (*television*) a featured program that is not part of a series ‖ something specially singled out and featured [fr. O.F. *especial*]

special constable (*Br.*) a man employed as a policeman on special occasions

special court-martial a military court for offenses less serious than those warranting a general court-martial. It is composed of three or more officers, the judge advocate and defense counsel, and can impose only certain limited fines or punishment

special delivery (*Am.=Br.* express post) the system of delivering mail for a special fee without waiting for the next regular delivery ‖ (*Am.=Br.* express letter) a letter sent by this system

Special Drawing Rights international reserve units created by the International Monetary Fund in 1969 to supplement the limited supplies of gold and dollars, which had been the prime stable international monetary assets *abbr.* **SDRs** *also* paper gold

spe·cial·ism (speʃəlizəm) *n.* a specializing in a particular branch of study or in a particular field of a profession ‖ such a branch or field

spe·cial·ist (speʃəlist) *n.* someone who devotes himself to a particular branch of study, or (esp. a doctor) to a particular branch of his profession

spe·ci·al·ty [illegible] **spe·cial·ties** [illegible] (*Br.*) a specialty ‖ some particular distinguishing feature [fr. O.F. *specialité*]

spe·cial·i·za·tion (speʃəlizeiʃən) *n.* a specializing or being specialized

spe·cial·ize (spéʃəlaiz) *pres. part.* **spe·cial·iz·ing** *past* and *past part.* **spe·cial·ized** *v.i.* to become a specialist, to restrict one's studies, interests, activities etc. to a particular branch or field, *he specializes in modern languages* ‖ to become specialized ‖ (*biol.*) to adapt an organ for a particular purpose ‖ *v.t.* to restrict, to limit, *to specialize one's interests* [fr. F. *specialiser*]

special licence (*Br.*) a license giving permission to marry without the usual preliminaries of public notice and residence, and in a place or at a time other than those legally appointed

spe·cial·ly (speʃəli:) *adv.* in a special manner for a special purpose, with a special intention

Special Mission Fleet U.S. Air Force unit assigned to transport government officials and visiting dignitaries

special pleading [illegible] allegations made by the other side, esp. to avoid damaging admissions ‖ an argument used for [illegible]

special relativity [illegible]

special reserve sharing [illegible]

specialty [illegible] [illegible] interest ‖ something for which a district, restau[illegible]

special verdict (*law*) a verdict which sets out the facts on the material issues of a case as found by the jury, but which leaves the court to

spe·cie (spē′shē) *n.* money in coin **in specie** in

spe·cies (spē′shēz) *pl.* **spe·cies** *n.* (*biol.*) a group of individuals closely related in structure, capable of breeding within the group but not normally outside it ‖ (*biol.*) a systematic unit including geographical races and varieties and included within a structure of more comprehensive classification (e.g. a genus) ‖ (*logic*) a group having certain attributes in common and given a common name ‖ (*Roman Catholicism*) the outward form of the consecrated bread and wine ‖ (*pop.*) a sort, kind [L. appearance, form, kind]

spe·ci·fi·a·ble (spesifaiəb'l) *adj.* that can be

specific stated or understood, *he had no specific reason for coming* ‖ of a species, *specific name* ‖ characteristic of something, *specific properties* ‖ (*phys.*) being an arbitrary constant ‖ (of a disease) caused by a particular infection ‖ (of a remedy) having particular influence on a particular disease or particular part of the body **2.** *n.* (*med.*) a adv. [fr. M.L. *specificus*]

specific address (*computer*) permanent location of data in a computer storage *also* absolute address

spec·i·fi·ca·tion (spesifikeiʃən) *n.* the act of specifying ‖ a detailed item, something specified ‖ (often *pl.*) a list of materials supplied and work done by a builder, engineer etc. or required for a project to be carried out ‖ a detailed description of a person's invention submitted by an inventor when applying for a patent [fr. M.L. *specificatio* (*specificationis*)]

specific gravity (*phys.*) the numerical ratio between the weight, at any chosen place, of a given volume of a substance and the weight, at the same place, of an equal volume of water at 4° C., i.e. the ratio of the density of a substance to the density of water at 4° C. (or other standard)

specific heat (*phys.*) the amount of heat required to raise the temperature of 1 gram of a substance through 1° C.

specific inductive capacity (*abbr.* SIC)

spec·i·fic·i·ty (spesifisiti:) *n.* the quality or state

specify *pres. part.* **spec·i·fy·ing** *pa.t.* and *past part.* **spec·i·fied** *v.t.* to name or mention explicitly ‖ to include in a specification [O.F. *specifier*]

spec·i·men (spesəmən) *n.* a part or individual taken to typify the whole or the class, esp. for the purpose of scientific investigation, a sample ‖ (*pop.*, used pejoratively) an individual of a specified sort, *he's a nasty specimen* [L. fr. *specere*, to look, look at]

specimen page a sample of a manuscript or other copy set up in type to establish the format, typeface, conventions etc. to be used when the complete work is printed

spe·cious·i·ty (spi:ʃɔsiti:) *n.* the state or quality of being specious [fr. L.L. *speciositas*]

spe·cious (spi:ʃəs) *adj.* apparently sound and reasonable, but fallacious [fr. L. *speciosus*, beautiful]

Speck (spek), Frank Gouldsmith (1881-1950), U.S. anthropologist and authority on Indian tribes of eastern North America, especially the Algonquian and Iroquois. His works include 'Ethnology of the Yuchi Indians' (1909) and 'Penobscot Man: the Life History of a Forest Tribe in Maine' (1940)

speck (spek) **1.** *n.* a small bit, a particle, *a speck of dust* ‖ a small spot or stain ‖ a spot indicating decay, e.g. in blemished fruit ‖ something made to appear very small by distance, *he was a speck on the horizon* **2.** *v.t.* to mark with specks [O.E.

speck·le (spek'l) **1.** *n.* a small spot or mark, esp. a natural one on skin etc. **2.** *v.t. pres. part.* **speck·ling** *past* and *past part.* **speck·led** to mark with speckles

specs (speks) *pl. n.* (*pop.*) a pair of spectacles

spec·ta·cle (spektək'l) *n.* a display, usually on a who, by his appearance or behavior, is seen to be ludicrous ‖ (*pl.*) a pair of lenses, mounted in a light frame which rests on the bridge of the nose and hooks or rests behind the ears, de- protect the eyes **spec·ta·cled** *adj.* wearing spectacles ‖ (of animals) having a marking suggesting spectacles [O.F.]

spec·tac·u·lar (spektækjulər) **1.** *adj.* impressive to see, *a spectacular dive* ‖ of a kind to attract attention of or relating to a spectacle **2.** *n.* a long, lavish television show or movie [fr. L. *spectaculum*, a spectacle]

spec·ta·tor (spekteitər, spekteitər) *n.* an onlooker, someone who watches (a show, display etc.) [L.]

spec·ter, esp. *Br.* **spec·tre** (spektər) *n.* the spirit of someone dead made visible, esp. with a terrifying appearance ‖ a threatening vision of something to come, *the specter of famine* [F. or fr. L. *spectrum*]

spectrobolometer (*astron.*) a SPECTROBOLOMETER

spec·tro·graph (spektrəgræf) *n.* a device for recording voiceprints *Cf* VOICEPRINT

spec·tral (spektrəl) *adj.* of or resembling a spectre ‖ of or relating to a spectrum or spectra

spectral type (*astron.*) the classification to which a star belongs on the basis of its spectrum. This system of classification comprises 10 categories which depend on the color, the observed relative prominence of spectral lines and bands, and the inferences obtained from these concerning surface temperature

spectre (*Br.*) SPECTER

spec·tro·graph (spektrəgra:f, spektrəgræf) *n.* a spectroscope equipped with a device for photographing or otherwise recording the spectrum produced (*SPECTROMETER) [SPECTRUM + GRAPH]

spec·trom·e·ter (spektrɔmitər) *n.* a spectroscope equipped with some form of detector that measures the intensity of light falling on it and that is used to produce a record of the emission or absorption of radiation as a function of wavelength (cf. MASS SPECTROMETER) ‖ an instrument used to measure refractive indices [SPECTRUM + METER]

spec·tro·pho·tom·e·ter (spektroufoutɔmitər) *n.* a spectroscope equipped with a photometer for measuring the intensities of radiation in different parts of the spectrum, usually compared with a standard beam of the same frequency [SPECTRUM + PHOTOMETER]

spec·tro·scope (spektrəskoup) *n.* any of various instruments used to disperse a beam of electromagnetic radiation into narrow wave bands (*RESOLVING POWER). A spectroscope consists of a source of radiation (in emission spectroscopy it is the material being studied), a collimator, a prism or diffraction grating for separating the narrow wave bands, and an optical system for bringing these to a focus. The optics and mechanics of spectroscopes vary widely, depending upon the kind of radiation employed (*SPECTROMETER, *SPECTROGRAPH, *SPECTROPHOTOMETER) **spec·tro·scop·ic** (spektrəskɔpik), **spec·tro·scop·i·cal** *adjs* **spec·tro·scop·i·cal·ly** *adv.* **spec·tros·co·pist** (spektrɔskəpist) *n.* **spec·tros·co·py** *n.* (*phys., chem.*) the study of the interaction of electromagnetic radiation with matter by means of the production and analysis of spectra. Modern models of matter picture the particles of which it is composed as being in a state of continuous vibrational, rotational and translational motion. Underlying most spectroscopic techniques is the fact that these atomic and subatomic particles are capable (since they bear charges) of absorbing and emitting energy in the form of electromagnetic radiation. Furthermore, depending upon the energy (and hence the frequency, *PLANCK RADIATION LAW) of this radiation, different portions of the atomic or molecular structure are involved (*INFRARED SPECTROSCOPY, *ULTRAVIOLET SPECTROSCOPY, *VISIBLE SPECTRUM, *MICROWAVE SPECTRUM) Quantum theory requires that e.g. a spinning molecule or circulating electron can possess energy only in certain definite, permitted amounts. It follows that in absorbing or emitting energy only those transitions that bring the system from one allowed state to another can occur, and therefore only certain wavelengths of electromagnetic radiation will be emitted or absorbed

Generally there are two methods of studying these interactions: the production of emission spectra and of absorption spectra. Emission and absorption spectra are further subdivided according to the character of the radiation employed, different optical and mechanical systems being required for handling each band

Spectroscopy finds increasingly wide use as an analytic tool in theoretical studies and is a potent means of identifying the components of complex mixtures and of unknown substances. Thus the infrared absorption spectrum of a pure substance is accepted as a proof that the substance is present, and it provides an extremely useful clue to the structure of the substance (cf. NUCLEAR MAGNETIC RESONANCE, *MASS SPECTROSCOPY) [G. *spektroskop*]

spec·trum (spektrəm) *pl.* **spec·tra** (spektrə), **spec·trums** *n.* an arrangement of the components of a beam, wave band or sound separated and displayed in order according to some varying factor, e.g. energy, charge-to-mass ratio, wavelength ‖ the band of colors (red, orange, yellow, green, blue, indigo, violet) into which a beam of light is decomposed by a prism ‖ the image retained on the retina when the eyes are turned away after staring at a bright colored object (*MASS SPECTRUM, *MOLECULAR SPECTRUM, *SPECTROSCOPY) [F. or fr. L. *spectrum* fr. *specere*, to look]

spectrum of war (*mil.*) **1.** the full range of a conflict **2.** cold, limited, and general war

spec·u·lar (spekjulər) *adj.* of, pertaining to or having the qualities of a mirror ‖ (of a surface) producing an image, i.e. reflecting coherently [fr. L. *specularis*]

spec·u·late (spekjuleit) *pres. part.* **spec·u·lat·ing** *past* and *past part.* **spec·u·lat·ed** *v.i.* to consider possibilities and probabilities, *it is idle to speculate about what might have happened* ‖ to undertake commercial transactions involving serious risk for the sake of possible large winnings, esp. to buy and sell in the hope of profiting from fluctuating prices, sometimes in an antisocial way [fr. L. *speculari* (*speculatus*), to watch]

spec·u·la·tion (spekjuléiʃən) *n.* theorizing, conjecture, *her departure gave rise to speculation* ‖ commercial activity involving serious risk in the hope of large profits ‖ an enterprise involving such activity [fr. L.L. *speculatio* (*speculationis*)]

spec·u·la·tive (spékjuleitiv, spékjulətiv) *adj.* of or concerning speculation ‖ given to speculating [O.F. *speculatif*]

spec·u·la·tor (spékjuleitər) *n.* someone who speculates [L. fr. *speculari*, to watch]

spec·u·lum (spékjuləm) *pl.* **spec·u·la** (spékjulə) **spec·u·lums** *n.* an instrument for examining body cavities ‖ a mirror of polished metal, used in telescopes etc. ‖ a colored patch on the wing of some birds [L. = mirror]

speculum metal an alloy, principally of copper and tin, which takes a very high polish and is used for making reflecting surfaces

sped alt. *past* and *past part.* of SPEED

speech (spi:tʃ) *n.* the ability to speak, *he lost his speech* ‖ the act of speaking, *she broke into speech* ‖ that which is spoken, esp. an address to an audience ‖ a group of lines given to a character in a play ‖ manner of speaking, *country speech* ‖ the theory of oral communication, e.g. as studied in some colleges ‖ (*mus.*) the sounding of an instrument, esp. of an organ pipe [O.E. sprǽc, later spǽc]

speech community all the people who speak a mutually intelligible language or dialect

speech day (*Br.*) the day when parents attend a school to witness the presentation of prizes to the pupils, and to hear speeches

speech·i·fy (spi:tʃifai) *pres. part.* **speech·i·fy·ing** *past* and *past part.* **speech·i·fied** *v.i.* to make unnecessary speeches, holding forth in a tedious or pompous manner

speech·less (spi:tʃlis) *adj.* without the ability to speak ‖ temporarily unable to speak because of some emotional shock or injury ‖ silent

speech pathology *SPEECH THERAPY

speech processing technique for changing characteristics of voice to improve intelligibility for transmission

speech synthesis artificial simulation of speech, e.g., electronically, by computer — **speech synthesizer**

speech therapy the study, examination, and treatment of defects and diseases of the voice, and of spoken and written language *also* speech pathology — **speech pathologist** *n.* — **speech therapist** *n.*

Speed (spi:d), John (c. 1552-1629), English antiquarian and cartographer. His 'Theatre of the Empire of Great Britaine' (1611) is a valuable collection of detailed maps of the English counties

speed (spi:d) *n.* rate of motion ‖ (*phys.*) the magnitude of a velocity vector irrespective of its direction ‖ a transmission gear ‖ the rate at

which something proceed or relate [*fig.*] the rapidity with which [illegible] acted on by light, usually expressed by a number ‖ (*photog.*) the time during which the shutter of a camera is open [O.E. *spēd*]

speed *pres. part.* **speed·ing** *past and past part.* **sped** (sped), **speed·ed** *v.t.* to move, act, change, pass etc. at a high speed ‖ to drive a vehicle more rapidly than is safe or legal ‖ *v.t.* to cause to move at a high speed | to set (an engine) to run at a certain speed **to speed up** to increase the speed of ‖ to go faster [O.E. *spēdan*]

speed (*slang*) a stimulant drug, esp. methamphetamine

speed·ball [illegible] of 11 players on each team, combining elements of basketball and football, invented in 1921 by Elmer D. Mitchell

speed·boat (spēdbōt) *n.* a motorboat capable of traveling at high speed

speed freak (*slang*) a habitual speed user

speed·i·ly (spē′dilē) *adv.* with speed, quickly

speed·i·ness (spē′dē·nis) *n.* the state or quality of being speedy

speed·om·e·ter (spidŏm′itər) *n.* [illegible] shows the speed at which a vehicle is moving

speed-read·ing (spē′drē′diŋ) *n.* technique and practice of rapid reading accomplished by extending sight and comprehension span to include several words or passages at one glance **speed-read** *v.* **speed-reader** *n.*

speed shop (*automobile*) a hot-rodders' supply store

speed-up (spē′dʌp) *n.* the act of speeding up | (esp. in factories) an increase in speed and output not accompanied by an increase in salary

speed·way (spē′dwā) *n.* a racetrack, esp. for motorcycles ‖ a road on which fast driving is permitted

speed·well (spē′dwel) *n.* a member of *Veronica*, fam. *Scrophulariaceae*, a genus of plants native to the temperate regions of both hemispheres, many species of which are cultivated as garden flowers

speed·y (spē′dē) *comp.* **speed·i·er** *superl.* **speed·i·est** *adj.* swift, having a good capacity for speed ‖ prompt, *it gives speedy relief*

speiss (spais) *n.* a compound of arsenic, nickel, copper etc. produced in smelting certain lead ores [fr. G. *speise*, amalgam]

Speke (spēk), John Hanning (1827-64), British explorer. He accompanied Sir Richard Burton to Somaliland (1854) and to E. Africa (1857-9). After they had discovered Lake Tanganyika (1858), Speke went on to discover Lake Victoria (1858), claiming it as the source of the Nile. In 1860-3 he traced the White Nile from its source, through the Sudan, to its mouth

spe·le·ol·o·gist (spē′lē·ŏlə·jist) *n.* someone who specializes in speleology

spe·le·ol·o·gy, *Br.* also **spe·lae·ol·o·gy** (spē′lē·ŏlə·jē) *n.* the scientific study of caves | spelunking [fr. L. *spelaeum*, cave + Gk *logos*, discourse]

spell (spel) **1.** *v.t.* (*pop.*) to relieve (a person) by taking a turn at work ‖ *v.i.* to rest from work for a period **2.** *n.* a turn at work, a shift | a short period, *a spell in the country* ‖ (*Austral.*) a period of relaxation, rest from work ‖ a bout or period (of illness, depression etc.), *he's going through a bad spell* [etym. doubtful]

spell *pres. part.* **spell·ing** *past and past part.* **spelled,** esp. *Br.* **spelt** (spelt) *v.t.* to name or write the letters of (a word) in order | (of specified letters) to make up (a word), *c-a-t spells cat* ‖ to signify, *the drought spells disaster for thousands* ‖ *v.i.* to form words by letters, *her typing is good, but she spells badly* **to spell out** to make out the meaning of (words, a written passage etc.) with difficulty ‖ to read out letter by letter ‖ to explain in full detail [fr. O.F. *espeller, espeler*]

spell *n.* an incantation, words which properly chanted or uttered are supposed to have magical effect ‖ the power to charm or fascinate, *the spell of Ireland* ‖ a state of enchantment, *putting on the light broke the spell* [O.E. *spel, spell*, a story]

spell·bind [illegible] *past and past part* **spell·bound** (spel′baund) *v.t.* to put a spell upon | to enchant, fascinate **spell-bind·er** *n.* a speaker or entertainer who has strong power over an audience **spell-bound** *adj.* entranced ‖ bound as if by a spell, esp. rendered motionless [illegible]

spell·ing (spel′iŋ) [illegible] orthography

spelling bee [illegible]

spelt [illegible] *n.* [illegible] a variety of wheat grown in Germany and Switzerland [O.E. *spelta*]

spelt alt. *past and past part.* of SPELL

spel·ter (spel′tər) *n.* commercial zinc, about 97% [illegible]

spellbinder (spel′bindər) *n.* [illegible] enthusiast

spe·lunk·ing (spilʌŋkiŋ) *n.* (*Am. Br.* potholing) the sport of exploring underground caves [fr. L. *spelunca*, cave]

Spen·cer (spensər), Herbert (1820-1903), English philosopher. His chief work was 'Synthetic Philosophy' (1860-1900) in several volumes, each treating a different branch of knowledge. He was the founder of an evolutionary philosophy [illegible] and development of language [illegible] social philosophy

Spencer [illegible] (1891-1961), English painter. His works include landscapes, portraits and nudes, but he is best known for his [illegible] on a very large scale and show much distortion and some private symbolism. His pictures often show Christ in a 20th-c. English setting

spen·cer (spensər) *n.* a fore-and-aft sail that serves as a trysail [etym. doubtful]

spencer *n.* [illegible] (waist-length) or bodice | (*hist.*) a man's double-breasted tailless coat or jacket of the late 18th c. and early 19th c. [after the 2nd Earl *Spencer* (1758-1834)]

spend (spend) *pres. part.* **spend·ing** *past and past part* **spent** (spent) *v.t.* to pay out (money) for purchases ‖ to exhaust, wear out (oneself or itself) | to pass (time) | *v.i.* to pay out money [O.E. *spendan* fr. L. *expendere*]

spend·thrift (spendθrift) **1.** *n.* someone who spends too much and spends wastefully **2.** *adj.* spending too much, wasteful

Speng·ler (pengələr), Oswald (1880-1936), German philosopher. In his chief work, 'The Decline of the West' (2 vols, 1916, 1922), he predicts the end of Western civilization by examining aspects of it (politics, mathematics, art etc.) and finding analogies with declining civilizations of the past

Spen·ser (spensər), Edmund (c. 1552-99), English poet. His most celebrated poem is 'The Faerie Queene' (1589, 1596), an allegorical, chivalric, epic romance originally conceived in 12 books, of which only the first six and fragments of a seventh were written. Spenser's other works include 'The Shepheardes Calender' (1579), 'Epithalamion' (1595) and 'Prothalamion' (1596) and many sonnets. He enriched poetic diction by introducing into his own poetry foreign loanwords, archaisms, pseudo-archaisms and dialect words. He adapted contemporary sonnet form, writing three linked quatrains and a couplet, and in 'The Faerie Queene' perfected a new stanza form which became known as the Spenserian stanza. Many of his poems contain thinly disguised references to contemporary political figures, thus the faerie queene served by the knights in the poem is, at one level of the allegory, Queen Elizabeth. Spenser's poetry influenced Milton, Wordsworth and Keats, and cast a spell on those for whom poetry was the creation of another world, a dream world of romance and enchantment, largely insulated from the realities of human [illegible]

Spen·se·ri·an (spensiəriən) *adj.* of or characteristic of Edmund Spenser or his poetry

Spenserian stanza a nine-lined stanza perfected by Edmund Spenser, who used it in 'The Faerie Queene'. It was later employed by Byron, Shelley and Keats. It is suitable only for long narrative poems. Eight iambic pentameters are followed by an alexandrine and are [illegible]

spent [illegible] devoid of further energy | (of shells, cartridges etc.) exploded, having lost its elasticity, plasticity or other active principle

O.F. *esperme* or L. *sperma* fr. Gk]

sper·ma·ce·ti (spə:rməsē′tē) *n.* a glistening white fatty, waxy substance, chiefly cetyl palmitate, $C_{15}H_{31}COOC_{16}H_{33}$, found in sperm oil [illegible] cosmetics, candles etc. [M.L. fr. L.L. *sperma*, [illegible]

sper·mar·y (spə:rmərē) *pl.* **sper·mar·ies** *n.* an organ in which spermatozoa are produced, e.g. a [illegible]

sper·mat·ic [illegible] (*anat.*) relating to spermatozoa | relating to a testis [fr. M.L. *spermaticus*]

spermatic cord a cord on which a testis hangs and which contains vessels and nerves

spermatic fluid [illegible]

sper·ma·tid (spə:rmətid) *n.* a nonmotile and otherwise immature male germ cell produced by the second meiotic division and leading to the mature spermatozoon by cytoplasmic differ[illegible] [fr. Gk *sperma* (*spermatos*), seed]

sper·ma·ti·um [illegible] **sper·ma·tia** (spə:rmē′i·ə) *n.* a nonmotile male gamete in red algae | a cell functioning as a male gamete in various lichens and fungi [Mod. L. fr. Gk [illegible] seed]

sper·mat·o·cyte (spə:rmǽtəsait) *n.* an immature male germ cell (the primary spermatocyte) just prior to the first maturation division, or each cell (secondary spermatocyte) formed during that process and transformed into a spermatid by the second maturation division (*MEIOSIS, *SPERMATOGENESIS) [fr. Gk *sperma* (*spermatos*), seed + *kutos*, receptacle]

sper·ma·to·gen·e·sis (spə:rmətədʒenisis) *n.* the entire process of formation and maturation of the male gamete from spermatogonium through primary and secondary spermatocytes and spermatid to spermatozoon **sper·ma·to·ge·net·ic** *adj.* [Mod. L. fr. Gk *sperma* (*spermatos*), seed, [illegible] origin]

sper·ma·to·go·ni·um [illegible] **sper·ma·to·go·ni·a** (spə:rmətəgóuni:ə) *n.* a primordial male germ cell (*SPERMATOGENESIS) [Mod. L. fr. Gk *sperma* (*spermatos*), seed + *gonē*, [illegible]

sperm·a·toph·o·ral (spə:rmətɔfərəl) *adj.* of or having to do with a spermatophore

sper·mat·o·phore (spə:rmǽtəfɔr, spə:rmǽtəfour) *n.* a capsule or mass containing spermatozoa ejaculated by male mollusks, annelids and other animals [fr. Gk *sperma* (*spermatos*), seed + *-phoros*, bearing]

sper·mat·o·phyte (spə:rmǽtəfait) *n.* a member of *Spermatophyta*, plants producing seeds **sper·ma·to·phyt·ic** (spə:rmətəfitik) *adj.* [fr. Gk *sperma* (*spermatos*), seed + *phuton*, plant]

spermatozoa *pl.* of SPERMATOZOON

sper·ma·to·zo·al (spə:rmətəzouəl) *adj.* of or having to do with spermatozoa

sper·ma·to·zo·an (spə:rmətəzouən) *adj.* spermatozoal

sper·ma·to·zo·ic (spə:rmətəzouik) *adj.* spermatozoal

sper·ma·to·zo·id (spə:rmətəzouid) *n.* the motile male gamete or sexual cell of a plant freed in the water from the antheridium in which it has developed

sper·ma·to·zo·on (spə:rmətəzouɔn) *pl.* **sper·ma·to·zo·a** (spə:rmətəzouə) *n.* a motile male reproductive haploid cell (*SPERMATOGENESIS, *FERTILIZATION) [Mod. L. fr. Gk *sperma* (*spermatos*), seed + *zoon*, animal]

sper·mo·go·ni·um (spə:rməgouni:əm) *pl.* **sper·mo·go·ni·a** (spə:rməgouni:ə) *n.* the receptacle or capsule of spermatia in certain lichens and fungi [Mod. L. fr. Gk *sperma*, seed + *gonē*, offspring]

sperm oil a liquid wax, not a true oil, light yellow in color and contained in the large head cavities of the sperm whale. When the spermaceti in it has been extracted, sperm oil is used as a lubricant and, in conjunction with other marine oils, as a leather dressing (cf. WHALE OIL)

sperm whale *Physeter catodon* or *P. macrocephalus* [illegible] whales, measuring up to 60 ft in length, having a closed head cavity containing spermaceti and oil. A large sperm whale may yield up to 100 barrels of sperm oil and 24 barrels of spermaceti [short for *spermaceti whale*]

Sper·ry (sperē), Elmer Ambrose (1860-1930), American inventor of the gyroscopic compass

sper·ry·lite (spérəlait) *n.* platinum arsenide, $PtAs_2$, the only natural compound of platinum. It occurs in white crystals and granular form [after Francis L. *Sperry*, 19th-c. Canadian [illegible]

spew (spju:) **1.** *v.t.* (*rhet.*) to vomit (*rhet.*, usually with 'out') to pour out (curses etc.) with [illegible] **2.** *n.* [illegible]

Spey (spei) a river of N.E. Scotland, flowing northeast 110 miles from Loch Spey, in the [illegible]

Inverness highlands, to the North Sea: salmon

(1529) at which toleration was refused to Lutherans in Catholic states and to Zwinglians

sphag·nums *n.* a member of *Sphagnum*, a genus of soft mosses, the only representative of the order *Sphagnaceae*. The plants are colored by chlorophyll and brown, yellow or red pigments, but are pale on account of air-containing tissues. Their remains, with other plant debris, form peat [Mod. L. fr. Gk *sphagnos*, a kind of

sphaleros, deceptive]

sphene (sfin) *n.* titanite [F. *sphene* fr. Gk]

sphe·no·don (sfi:nədɒn) *n.* the tuatara [fr. Gk *sphēn*, a wedge + *odous* (*odontos*), tooth]

pound bone at the base of the cranium ‖ sphenoidal **2.** *n.* a wedge-shaped crystal with four equal isosceles triangles as faces | the sphenoid bone **sphe·noi·dal** *adj.* wedge-shaped [fr. Mod. L. *sphenoides* fr. Gk fr. *sphēn*, a wedge + *eidēs*, form]

sphe·nop·sid (sfi:nɒpsid) *n.* a member of *Sphenopsida*, a subphylum of chlorophyll-bearing, vascular plants (the horsetails) and many much larger fossil forms that flourished in the Carboniferous [fr. Mod. L. *Sphenopsida* fr. Gk *sphēn*, a wedge + *opsis*, vision, appearance]

sphere (sfiər) *n.* (*geom.*) the solid figure generated when a circle rotates about a diameter, every point on its surface being thus equidistant from the center of this circle (called the center of the sphere). The surface area of a sphere = 4π (radius)^2, the volume of a sphere = $\frac{4}{3}\pi$ (radius)^3 ‖ (*loosely*) anything of approximately this shape | a limited domain within which something is effective, *sphere of influence* ‖ a range of knowledge, *it lies outside my sphere* | a group of people in the social hierarchy (with respect to belonging or not belonging to it), *he moves in more exalted spheres than they do* | (*hist.*) any of the hollow concentric transparent globes once conceived as moving around the earth and carrying in them the sun, planets and fixed stars and producing music by their vibrations | (*hist.*) the path, within one of these concentric globes, followed by the sun, planets or fixed stars [O.F. *espere* fr. L.L. fr. Gk]

spher·ic (sferik) *adj.* spherical **spher·i·cal** *adj.* shaped like a sphere | relating to a sphere [fr. L.L. *sphericus*, *sphaericus* fr. Gk]

spherical aberration the distortion of an image produced by a spherical lens or mirror because of the different focal points for rays incident upon the central region and those incident upon the outer margins

spherical angle the angle between two intersecting arcs of great circles on a sphere measured between the tangents at the point of

spherical polygon a figure formed by arcs of great circles on a sphere

spherical triangle the three-sided enclosed figure formed on the surface of a sphere which is bounded by the arcs of three great circles

spher·ic·i·ty (sfiris·iti:) *n.* the quality or state of

spher·ics (sferiks) *n.* spherical geometry and

sphe·roid (sfiərɔid) *n.* a figure resembling a sphere | spheroidal (sfiərɔid'l) *adj.* **sphe·roi·dic·i·ty** (sfiərɔidisiti:)

sphe·rom·e·ter (sfirɒmitər) *n.* an instrument used to measure the curvature of a spherical or cylindrical surface [fr. F. *spherometre*]

spher·o·plasts (sfiərəplæst) *n.* (*cytol.*) mitochondria or other cytoplasmic bodies, thread-like bodies in the protoplasm of cells, involved in the enzyme processes *also* chondriosomes

spher·u·lar (sferjulər) *adj.* having the form of a

spher·ule (sferju:l) *n.* a small sphere [fr. L.

spher·u·lite (sferjulait) *n.* a spherical crystalline concretion, esp. of quartz and feldspar,

muscle which, by its contraction, is able to close

sphing·o·lip·i·do·sis (sfingoulipədousis) *n.* (*med.*) a metabolic disorder in which certain glycolipids and phospholipids accumulate in tissue, e.g. Tay-Sachs disease, Gaucher's disease, Niemann-Pick disease

sphinx (sfiŋks) *pl.* **sphinx·es, sphin·ges** (sfindʒi:z) *n.* a compound creature having (in its most common form) a lion's body and a human head, either male or female. It originated in Egypt and the concept of the sphinx spread throughout the ancient world. Representations of the sphinx are found in Egyptian, Assyrian, Greek, Mayan and Roman art and sculpture. They are usually recumbent, may or may not be winged, and sometimes have a ram's or hawk's head. The heads of Egyptian sphinxes are usually royal portraits, and the lion bodies represent the pharaoh's strength. In Greek mythology, the Sphinx of Thebes had the head of a woman, the feet and tail of a lion and the wings of a bird. It devoured everyone who could not answer the riddle it asked, but when this was finally solved by Oedipus, the Sphinx killed itself | an inscrutable person ‖ a member of *Sphinx*, a genus of hawkmoths **the Sphinx** the great sphinx of Giza, 187 ft long, the head and body of which are carved of living rock [L. fr. Gk prob. fr. *sphingein*, to bind together]

sphra·gis·tic (sfrədʒistik) *adj.* of or relating to engraved seals **sphra·gis·tics** *n.* the study of engraved seals or signet rings [fr. Gk *sphragistikos*]

sphyg·mo·graph (sfigməgræf, sfigməgrɑf) *n.* an instrument for recording the arterial pulse rate on a graph [fr. Gk *sphugmos*, the pulse + GRAPH]

sphyg·mo·ma·nom·e·ter (sfigmoumənɒmitər) *n.* an instrument for measuring blood pressure, esp. of the arteries [fr. Gk *sphugmos*, the pulse + MANOMETER]

sphyg·mom·e·ter (sfigmɒmitər) *n.* an instrument for measuring the strength of the pulse [fr. Gk *sphugmos*, the pulse + METER]

spi·cate (spaikeit) *adj.* (*bot.*) having spikes | (*biol.*, e.g. of an inflorescence) arranged in the form of a spike or spikes [fr. L. *spicatus*, furnished with spikes]

spic·ca·to (spikɑtou) *adj.* (*mus.*) with springy bowing (the bow rebounding off the strings in the achieving of a series of rapid detached notes) [Ital.]

spice (spais) **1.** *n.* any of many vegetable substances, mostly plant parts from which the essential oils have not been extracted, used to impart their strong and aromatic flavors to food, and formerly to preserve foodstuffs from decay (e.g. cinnamon, cloves, nutmeg etc.) ‖ these substances collectively ‖ something which stimulates agreeably, *variety is the spice of life* **2.** *v.t. pres. part.* **spic·ing** *past* and *past part.* **spiced** to flavor by adding spice ‖ to make more

spice·bush (spaisbuʃ) *n. Lindera bezoin*, fam. *Lauraceae*, an aromatic shrub having yellow flowers and scarlet or yellow berries

Spice Islands *MOLUCCAS

spic·i·ly (spaisili:) *adv.* in a spicy manner

spic·i·ness (spaisinis) *n.* the quality of being

spick-and-span (spikənspæn) *adj.* (*hist.*) turned out to look extremely smart ‖ all fresh and new [fr. older *spick and span new* extension of *spannew* fr. O.N. *spánn*, chip + *nýr*, new]

spic·u·late (spikjulit) *adj.* (*biol.*) covered with, having or consisting of spicules ‖ needlelike [fr. L. *spiculatus*]

spic·ule (spikju:l) *n.* (*zool.*) a minute needlelike body, siliceous or calcareous, found in some invertebrates, e.g. in sponges and radiolarians | (*bot.*) a small spike | any small needlelike formation, esp. of a hard material, e.g. ice [F.]

spic·y (spaisi:) *comp.* **spic·i·er** *superl.* **spic·i·est** *adj.* having the flavor of spices, stimulating the imagination, *spicy adventures* ‖ stimulating erotically, *spicy stories*

spi·der (spaidər) *n.* an animal of the order *Araneida*, subclass *Arachnida*, having eight legs, a large unsegmented abdomen, jaws often equipped with poison glands for paralyzing in-

and spinnerets from which a very fine thread is drawn and woven into a web. The web is used as a nest or, rendered sticky by a secretion, as a trap for flying insects, though some species catch their prey by running and capturing. There are at least 20,000 species. Any of several contrivances with long, thin structural parts: a frying pan, originally one supported on three legs ‖ a light phaeton with big, thin wheels [O.E. *spithra*]

spider hole (*mil.*) a disguised foxhole, esp. one used by a sniper

spider monkey one of many South American monkeys, esp. of genus *Ateles*, with long, slender, flexible limbs, prehensile tail and slender bodies (*MONKEY)

spider web a web made by a spider

spi·der·wort (spaidərwə:rt, spaidərwɔrt) *n.* a member of *Tradescantia*, fam. *Commelinaceae*, cultivated plants with usually blue or violet flowers. The six slender stamens are covered with hairs

spi·der·y (spaidəri:) *adj.* resembling or suggesting the appearance of a spider, esp. its long thin legs, *spidery handwriting* ‖ like a cobweb in formation, *spidery lace* ‖ infested with spiders

spie·gel·ei·sen (ʃpi:gəlaizən) *n.* pig iron containing manganese used in making steel by the Bessemer process [G. fr. *spiegel*, mirror + *eisen*, iron]

spiel (spi:l) **1.** *n.* (*pop.*) a speech or story, usually delivered volubly and with intent to persuade **2.** *v.t.* (*pop.*, with 'off') to recite or utter volubly, usually with intent to persuade ‖ (*pop.*, with 'off') to recite at length (something memorized) ‖ *v.i.* to talk volubly and often extravagantly [G. *spielen*, to play]

Spiel·berg (spi:lbə:rg), Steven (1947–), U.S. film director, known for his adventure and fantasy films. He directed 'Jaws' (1975), 'Close Encounters of the Third Kind' (1977), 'Raiders of the Lost Ark' (1981), 'E.T.: The Extraterrestrial' (1982), 'Indiana Jones and the Temple of Doom' (1984) and 'The Color Purple' (1985)

spig·ot (spigət) *n.* a device which controls the flow of a fluid from or through a pipe or from a container ‖ a peg or plug for the vent of a barrel or cask ‖ the end of one pipe fitting into the socket of another [prob. fr. Prov. *espigot*]

spike (spaik) **1.** *n.* a thin, sharp-pointed piece of metal, rock or other hard material ‖ a sharply pointed rod or shaft set with the point upward, e.g. on a wall, as an obstacle ‖ a pointed nail set (in small quantity) into the soles of climbing boots or running shoes to prevent slipping ‖ a large nail used to fasten a rail to a railroad tie ‖ a single antler of a young deer ‖ an ear of grain, e.g. wheat | (*Br.*) a spindle (filing device) ‖ (*bot.*) an inflorescence with sessile flowers along the stem, the youngest towards the tip **2.** *v. pres. part.* **spik·ing** *past* and *past part.* **spiked** *v.t.* to furnish, fasten or pierce with a spike or with spikes | to render (a gun) useless to an enemy who captures it ‖ to thwart, *to spike someone's plans* ‖ to put an end to (e.g. a rumor) ‖ (*baseball* etc.) to injure (a player) with the spikes of one's shoes ‖ (*pop.*) to add liquor to (a nonalcoholic drink) ‖ *v.i.* to form a spike, or project like one [fr. L. *spica*, ear of grain]

spike·let (spaiklit) *n.* (*bot.*) a small spike, bearing few flowers, esp. in certain sedges and grasses

spike·nard (spaiknurd) *n. Nardostachys jatamansi*, fam. *Valerianaceae*, an East Indian plant with fragrant rhizomes ‖ (*hist.*) a costly ointment prepared from these rhizomes ‖ *Aralia racemosa*, an American plant like sarsaparilla [fr. M.L. or L.L. *spica*, ear of grain + *nardi*, gen. of *nardus*, aromatic root]

spik·y (spaiki:) *comp.* **spik·i·er** *superl.* **spik·i·est** *adj.* having a spike or spikes ‖ having the shape of a spike | (*Br.*) being touchy and aggressive

spile (spail) **1.** *n.* a small peg or plug to stop the vent in a barrel or cask ‖ a timber pile driven into the earth as a support ‖ a spout inserted in a sugar maple tree to drain off sap **2.** *v.t. pres. part.* **spil·ing** *past* and *past part.* **spiled** to make a vent in (a cask) | to empty through a spile ‖ to furnish (a barrel etc.) with a spile or spiles ‖ to plug (a hole) with a spile [M.Du. –a splinter]

spill (spil) *n.* a thin wooden strip, or folded strip of paper, for lighting a pipe etc. ‖ a small peg or plug for stopping up holes, a spile ‖ a splinter

spill **1.** *v. pres. part.* **spill·ing** *past* and *past part.* **spilled, spilt** (spilt) *v.t.* to lose or waste (a fluid etc.) by causing or permitting it to fall out of or escape from its container | (*naut.*) to empty (a sail) of wind (*rhet.*) to shed (blood) in violence ‖ (*pop.*) to divulge (information), *he spilled the whole story* (*pop.*) to cause (someone) to fall from a horse, vehicle etc. ‖ *v.i.* (of a liquid etc.) to fall out of or escape from a container and so be

lost or wasted ‖ (of waves, with 'onto') to break gently ‖ to descend as though overflowing | with out overflow **to spill the beans** *coll.* to divulge information **2.** *n.* a fall from a saddle, vehicle, wall etc [O.E. *spillan*, to destroy]

spill-back (spilbak) *n.* traffic conditions in which motorists become trapped in an intersection when the light turns red, preventing drivers on cross streets from passing through

spil-li-kin (spilikin) *n.* a jackstraw **spil-li-kins** *n.* the game of jackstraws [dim. of SPILL *n.*, a splinter]

spill-way (spilwei) *n.* a passage for the overflow of water from a reservoir etc., the part of a dam over which water flows

spi-lo-site (spailəsait) *n.* greenish schistose rock spotted with chlorite [G. *spilos*, spot]

spilt alt. *past* and *past part.* of SPILL

spin (spin) **1.** *v. pres. part.* **spin-ning** *past* and *past part.* **spun** (spʌn) *v.t.* to turn rapidly about an internal axis ‖ (*aeron.*) to dive in a spiral | to engage in the process of drawing out and twisting cotton, silk etc into a long, continuous thread ‖ (of spiders and silkworms) to secrete a thread or threads ‖ to move very fast | (of ideas, thoughts etc.) to become wildly confused | (*fishing*) to fish using a spinner | *v.t.* to cause to spin, *to spin a top* ‖ to draw out and twist (cotton, silk etc.) into a long, continuous thread | to secrete threads to make (a cocoon, web etc.) ‖ to give a round shape to, by using a lathe etc ‖ to tell (a story) at great length ‖ (*fishing*) to fish for, using a spinner **to spin a yarn** to tell a rather long involved story esp in order to deceive **to spin out** to cause to last or seem to last for a long time, *to spin out a vacation* **2.** *n.* the act of spinning ‖ a rapid rotating movement, *to put spin on a ball*, or such a motion downwards, *the aircraft went into a spin* ‖ (*old-fash.*) a short, rapid journey for pleasure, *to go for a spin on a motorcycle* ‖ a state of wild mental confusion | (*phys.*) the rotation of an electron or other fundamental particle about its own axis, producing a magnetic moment and associated with an angular momentum. Electron spin is mainly responsible for the magnetic properties of matter. In quantum theory an electron has an angular momentum whose space orientation is quantized taking on two values, designated by the spin quantum number (*abbr.* s, where s = $\frac{1}{2}$±, the sign indicating the sense of the motion) (*BOHR MAGNETON) [O.E. *spinnan*]

spi-na bi-fi-da (spáinə báifədə) *n.* (*med.*) an inherited defect in the closure of the vertebral canal allowing the meninges to protrude

spin-ach (spinitʃ) *n. Spinacia oleracea*, fam. *Chenopodiaceae*, a herbaceous annual native to S.W. Asia, introduced to Europe after Roman times. Its dark green, crisp leaves are cooked as a vegetable [fr. O.F. *espinage*, *espinache*, *spinache*]

spinach beet *Beta vulgaris cicla*, a variety of beet, the leaves of which are eaten as a substitute for spinach

spi-nal (spáin'l) *adj.* in the region of, pertaining to, or like the spinal column, spinal cord or spinal canal [fr. L.L. *spinalis*]

spinal canal the canal, formed by the neural arches of the vertebrae, which encloses and protects the spinal cord

spinal column the series of vertebrae extending from the base of the skull through the median dorsal part of the body to the tail. It serves to protect the spinal cord and acts as a principal supporting structure in virtually all vertebrates. Flexible cartilaginous intervertebral disks allow the vertebrae to move with some degree of freedom over another. The vertebrae are joined by ligaments allowing for considerable flexibility. (*NOTOCHORD)

spinal cord the dorsal cord of neural tissue continuous with the medulla oblongata that lies within the spinal canal in vertebrates. In man there are 31 pairs of nerves along the spinal cord, which acts as a pathway for sensory and motor impulses to and from the brain and as a system of reflex centers often independent of the brain

spin-ar (spinur) *n.* (*astron.*) a heavenly body spinning very rapidly

spin-dle (spind'l) **1.** *n.* a thin cylindrical rod which serves as an axis of rotation or itself rotates ‖ the thin rod in a spinning wheel serving to twist and wind the thread | the rod bearing a bobbin ‖ [measure of length] ton, 14,400 yds of linen) | (*naut.*) a long vertical iron rod set up on a rock as a navigational aid | *Am.* the chromosomal apparatus of the nucleus formed during the prophase of meiosis and mitosis along which the chromosomes are distributed to daughter nuclei | a shaft in a lathe, capstan etc ‖ the fixed spike on a phonograph turntable over which the record fits | (*Am.* *Br.* spike) a filing device consisting of a sharpened rod or bar on which receipts, bills etc are impaled **2.** *v.i. pres. part.* **spin-dling** *past* and *past part.* **spin-dled** (esp. of a plant which develops a stem rather than a flower or fruit) to grow long and thin | *v.t.* to impale on a spindle | to give the form of a spindle to [O.E. *spinel*]

spin-dle-leg-ged (spind'llegid, spind'llegd) *adj.* having thin or scrawny legs

spin-dle-legs (spind'llegz) *n.* someone who has long scrawny legs | (*pl.*) long thin legs

spin-dle-shanks (spind'lʃæŋks) *n.* (of a person or his legs) spindlelegs

spindle tree *Euonymus europaeus*, fam. *Celastraceae*, a tree or shrub whose hard wood is used for skewers etc. The inconspicuous green flowers produce red four-valved capsules, enclosing seeds with orange arils

spin-dling (spindlin) *adj.* spindly

spin-dly (spindli) *comp.* **spin-dli-er** *superl.* **spin-dli-est** *adj.* very long and thin, esp. (in a person) suggesting weakness or scrawniness from overgrowth

spin-drift (spindrift) *n.* fine spray blown from the surface of water [alt. fr. *spoondrift*, etym. doubtful]

spine (spain) *n.* the spinal column | (*bot.*) a sharp-pointed outgrowth, e.g. from the stem or leaf of a thistle | (*zool.*) a similar protective outgrowth, e.g. one of the quills of a porcupine (*anat.*) any of the thin, pointed processes of various bones | a ridge of land, rock etc. resembling a backbone | (*printing*) the back of a bound book, on which title and author are usually printed [O.F. *espine* or L. *spina*, thorn]

spi-nel (spinel) *n.* any one of a group of minerals of composition $MO{\cdot}M^{1}_{2}O_{3}$ where M is a divalent metal, M^{1} a trivalent metal [F. *spinelle*]

spine-less (spainlis) *adj.* invertebrate ‖ having no spines or thorns | without determination and strength of character

spi-nes-cent (spainesənt) *adj.* (*bot.*) tending to be spinous [fr. L. *spinescens* (*spinescentis*) fr. *spinescere*, to grow thorny]

spin-et (spinit) *n.* a small stringed musical instrument resembling a harpsichord | a small electronic organ | an upright piano of reduced dimensions, esp. for use in limited space [Ital. *spinetta* prob. after Giovanni *Spinetti*, the 16th-c. inventor]

spin-na-ker (spinəkər) *n.* (*naut.*) a large triangular sail, carried by a yacht on a long, light pole, on the side opposite the mainsail. It is used when running before the wind [etym. doubtful]

spin-ner (spinər) *n.* a person or machine which spins ‖ a manufacturer engaged in spinning | (*fishing*) a bright metal vane which spins as the line is drawn through it, used e.g. for trout ‖ (*fishing*) a kind of fly used in trout fishing ‖ (*games*) a ball made to spin so that it rebounds obliquely when it hits the ground (*football*) a kick which is almost parallel to the goal line when about to play the ball | a nightjar | (*surfing*) a stunt of making a complete turn while

spin-ner-et (spinəret) *n.* a process or organ found on the abdomen of the larvae of certain silk-producing insects and on the abdomen of a spider. From this organ are exuded the secretions of the silk glands, which usually fuse to form a single thread used e.g. for making a web

spin-ney (spini) *n.* (*Br.*) a small group of trees

spin-ning (spinin) *n.* the process of making thread or yarn from natural or man-made fibers (in spiders and certain silk-producing insects

spinning jenny a power-driven machine, fitted

spinning wheel a machine for domestic spin

wheel worked by the hand or foot

spin-off (spinɔf, spinɒf) *n.* things derived as useful by-products from some larger and more or less unrelated whole, activity etc., *spin-off from space research includes many medical inventions* | an example of such derivations | divestment of a subsidiary company by a parent corporation

Spi-no-la (spinólə), Ambrosio, marquis of (1569-1630), Italian general. He distinguished himself in the service of Spain in capturing Ostend (1604) and in the Thirty Years' War

spi-nose (spainous) *adj.* spinous (covered with spines)

spi-nous (spainəs) *adj.* covered with or full of spines or thorns | having the form of a spine or thorn [fr. L. *spinosus*]

spin-out (spinaut) *n.* **1.** uncontrolled movement of an automobile esp. a skid causing it to run off the highway **2.** a spin in a complete circle

Spi-no-za (spinouzə), Baruch (1632-77), Dutch philosopher. In his 'Tractatus theologico-politicus' (1670) he develops a religious rationalism. In his 'Ethics' (1677), written in a strictly mathematical form, he expounds a theory of human salvation as knowledge of God, and also analyzes the human soul. His system is a pantheistic doctrine, according to which God is a substance constituted by an infinity of attributes, of which we know only two: thought and extension. The world is the sum of modes of these two attributes. Man is a collection of modes of thought and extension. The distinction between God and the created world can be reduced to a point of view ('Deus sive Natura'). He was a firm believer in political democracy as a reflection of reason

spin resonance *MAGNETIC RESONANCE

spin-scan (spinskæn) *n.* an infrared radiometer that provides a picture of cloud cover, day or night

spin-ster (spinstər) *n.* an unmarried woman | an old maid **spin-ster-hood** *n.* [fr. SPIN v.]

spin-to (spintou) *n.* (usu. ital.) the capacity to both sing and act—said of an opera singer — **spinto** *adj.*

spi-nule (spáinju:l) *n.* a very small spine [fr. L. *spinula*]

spi-nu-lose (spainjulous) *adj.* having or covered with spinules | shaped like a spinule [fr. Mod. L. *spinulosus*]

spin wave (*nuclear phys.*) a wave caused by a change in direction of the spin of electrons (*MAGNON)

Sri Lanka, formerly Ceylon, an independent state (area 25,332 sq miles, pop. 12,240,000) in S. Asia, an island in the Indian Ocean. Capital: Colombo. Race: 74% Sinhalese, and minorities of Tamils and Tamil-speaking Muslims or Moors. Languages: Sinhalese (official) and Tamil. Religion: 78% Hinayana Buddhist, 18% Hindu, smaller Christian and Moslem minorities. The land is 20% forest. The north is flat, with a swampy coast. The south is mountainous (highest point Mt Pidurutalagala, 8,297 ft). The climate is tropical with southwest monsoons in summer and northeast monsoons in winter. Rainfall: 25-50 ins in the north and east, 75-200 ins in the center and southwest. Average temperatures (F.): 80° in the lowlands (with little seasonal variation), 54° (Jan.) and 62° (May) in the highlands. Livestock: cattle, water buffaloes, goats. Agricultural products: rice, tea, coconuts, rubber. Mineral resources: graphite, iron. Exports: tea, rubber, coconuts. Imports: rice, textiles, petroleum products, machinery, vehicles, sugar. University of Ceylon (1942) and two other universities. Monetary unit: rupee (100 cents). HISTORY. The Sinhalese migrated from S. India to Ceylon about the 5th c. B.C. Ceylon became the center of Buddhist civilization (3rd c. B.C.). Arabs introduced Mohammedanism (8th c. A.D.) and controlled trade until the arrival of the Portuguese (1505). The Dutch superseded the Portuguese (1638) but were overthrown by the British (1796). Ceylon was annexed to the East India Co. (1796-1802), became a British Crown Colony (1802) and an independent member of the Commonwealth (1948). In 1972 it was renamed Sri Lanka (beautiful island). Conflict between the majority Sinhalese, who controlled the government after independence and the Tamils, who had held most civil service and professional positions under the British, turned increasingly violent after 1983. Militant Tamils demanded a separate Tamil state in the north and east, where Tamils predominate. The continuing conflict disrupted the country's economy, and efforts to end the violence by granting the Tamils greater autonomy made little progress

Su·dan (su:dæn) a republic (area 967,000 sq. miles, pop. 19,900,000) in N.E. Africa. Capital: Khartoum. People: mainly Arab-Nubian in the north, Nilotic (Dinka, Nuer, Shilluk, Bari) and Azande in the south. Languages: Arabic (official), African languages, English. Religion: 54% Moslem (north), 20% local African (south), 2% Christian. Universities: Khartoum (1956), Khartoum branch of Cairo University (1955), Islamic University (1965). The land is 3% arable, 10% pasture and grazing and 18% forest. It is mainly a plateau (1,000–3,000 ft), with mountains in the west (the Marra, rising to 10,130 ft), the south (to 10,456 ft), and near the Red Sea coast (to 9,000 ft). The south is mainly rain forest (White Nile valley) and savanna, the center semidesert except close to the Nile, and the north desert. South of Khartoum, between the White and the Blue Nile, is the fertile Gezira plain, the economic heart of the country. Average temperatures (F.) at Khartoum: Jan. 70°, July 80°. Extremes: 40°-115°. Rainfall: Khartoum 6 ins, S. White Nile valley 37 ins, southwest 43 ins. Livestock: cattle, sheep, goats, camels, donkeys, horses. Manufactures and industries: cement, food processing, rolling stock. Exports: cotton, gum arabic, peanuts, sesame, cottonseed, durra, oil cake, camels, hides and skins, cattle, sheep. Imports: cotton goods, machinery, metals, petroleum products, sugar, vehicles, tea, textiles, fertilizers, jute sacks, wheat flour, coffee, tires, cigarettes and tobacco. Port: Port Sudan. Monetary unit: Sudanese pound (100 piasters). HISTORY. The north of the Sudan formed the ancient country of Nubia, which was colonized by Egypt (2nd millennium B.C.). It was converted to Coptic Christianity (6th c. A.D.), but became part of Islam when conquered by the Arabs (15th c.). It was overrun (1820-2) by Mohammed Ali of Egypt. In Egyptian service, Baker and Gordon completed the conquest of the south and began to suppress the slave trade. The Mahdi led a revolt (1883-5), but his power was broken (1898) by an Anglo-Egyptian force under Kitchener. The Sudan was under an Anglo-Egyptian condominium (1899-1953), after which it was self-governing until Jan. 1, 1956, when it became an independent republic. It joined the Arab League and the U.N. (1956). A coup d'état

(1958) was followed by the establishment of military rule (1958-64). Parliamentary government was reestablished (1965). A revolt of the South against northern domination erupted (1962). A new army coup d'état (1969) introduced a degree of Arab socialism, and renamed the country the Sudan Democratic Republic. A certain autonomy was granted (1972) to the south. Civil war erupted again (1983) when the southern region was divided into three provinces and strict Islamic law was imposed throughout the country. Gen. Gaafar al Nimiery, in power since 1969 except for a brief period in 1971, was overthrown (1985) after nationwide riots protesting his imposition of economic austerity measures demanded by the U.S.A. and the International Monetary Fund. A transition government tried to improve the economy and to end foreign support for the southern rebels by attempting to improve relations with Libya and Ethiopia

sun (sʌn) **1.** *n.* the central controlling body of the solar system, lying at the principal focus of all the planetary orbits. In the galactic frame of reference, the sun is a typical dwarf yellow star located in a spiral arm near the outer edge of the Milky Way ‖ the light or heat received from the sun ‖ any heavenly body that is the center of a solar system ‖ (*rhet.*) a source of splendor **a place in the sun** an opportunity to expand and thrive **under the sun** in the world **2.** *v. pres. part.* **sun·ning** *past* and *past part.* **sunned** *v.t.* to expose to direct radiation from the sun ‖ *v.i.* to sit or lie in direct sunlight [O.E. *sunne*]

—The sun is a spherical body (diameter 865,400 miles) of mass 4.39×10^{27} tons (being 3.33×10^5 times more massive than the earth and 740 times more massive than the sum of the masses of the nine planets it controls) and density 1.44 times that of water. Its composition, spectroscopically determined (*FRAUNHOFER LINES), is approx. 90% hydrogen and approx. 10% helium, with small amounts of all the other known elements. Its structure includes a core whose center is at a temperature of 15 million degrees C. and at a pressure of billions of atmospheres: under such conditions matter is limited to an extremely dense gaseous state. The solar interior is surrounded by the photosphere. The extremely extended atmosphere of the sun consists of two regions: the chromosphere and the corona.

The energy of the sun is derived from the thermonuclear conversion of hydrogen into helium, which is thought to occur continuously in the extreme conditions found in the solar interior. This energy (in the form of heat and electromagnetic radiation) forces its way to the solar surface, the solar integrity being maintained by an oppositely directed intense gravitation (28 times greater at the surface of the sun than at the earth's surface). Only a small fraction of the total solar energy output (2.40×10^{11} horsepower distributed over its surface) reaches the earth, but it is responsible directly or indirectly for innumerable energy-requiring processes (e.g. growth of all plant and animal life, the winds, the production of power from natural fuels etc.) (*SUNSPOT CYCLE)

sun arc *sun lamp

sun·bath (sʌnbæθ, sʌnbɑθ) *n.* a period of exposure of the body to the sun or to a sun lamp

sun·bathe (sʌnbeið) *pres. part.* **sun·bath·ing** *past* and *past part.* **sun·bathed** *v.i.* to take a sunbath

sun·beam (sʌnbi:m) *n.* a ray of sunlight

sun bear *Helarctos malayanus* (or *Ursus malayanus*), fam. *Ursidae*, a small, mainly black bear with a short, fine coat, inhabiting the forests of the Malay Peninsula and islands east of Borneo

Sun·belt (sʌnbelt) *n.* the area of the southern U.S. from Virginia to California

sun·bird (sʌnbə:rd) *n.* any of a number of small songbirds of fam. *Nectariniidae*, with brilliant glossy plumage, resembling hummingbirds. They are found in Africa, S. Asia, Australia and the East Indies

sun·bon·net (sʌnbɔnit) *n.* a bonnet for women and girls with a front brim to shade the face and a back flap to shield the neck from the sun

sun·burn (sʌnbə:rn) **1.** *n.* reddening and blistering with consequent peeling of the skin through too sudden and too long exposure to the sun (tanning of the skin through exposure to the sun) **2.** *v. pres. part.* **sun·burn·ing** *past* and *past part.* **sunburned, sunburnt** cause to be bronzed or blistered by the sun ‖ *v.i.* to become bronzed or blistered by exposure to the sun

sun·dae (sʌndei) *n.* a portion of ice cream served with sauce, fruit, nuts, whipped cream etc. [etym. doubtful]

Sun·da Islands (sʌndə) a group of mountainous, volcanic islands in the Malay Archipelago, divided into the Greater and the Lesser Sundas. The Greater Sundas consist of Java, Sumatra, Borneo, Sulawesi and adjacent islands. The Lesser Sundas (Nusa Tenggara) comprise the chain running from Bali to Timor

sun dance a ceremonial dance of North and South American Indians in honor of the sun at the summer solstice

Sun·dar·bans (sʌndərbənz) a region (about 6,000 sq. miles) of swampy islets formed by the Ganges delta in Bengal, India and Bangladesh

Sun·day (sʌndi:, sʌndei) *n.* the first day of the week, the Christian sabbath **a month of Sundays** a very long time [O.E. *sunnandæg*, day of the sun]

Sunday best one's best clothes, kept esp. for wearing on Sundays

Sunday school a voluntary school held usually in a parish on Sunday for the religious instruction of children ‖ the teachers and pupils of such a school

sun·der (sʌndər) *v.t.* (*rhet.*) to break or tear apart ‖ (*rhet.*) to keep apart ‖ *v.i.* (*rhet.*) to break apart, to separate **in sunder** (*rhet.*) asunder [Late O.E. *syndrian, sundrian*]

Sun·der·land (sʌndərlənd), Robert Spencer, 2nd earl of (1640-1702), English statesman. An opportunist, he was in the pay of Louis XIV while also intriguing to put William of Orange on the English throne

Sunderland a port and county borough (pop. 196,152) in Durham, England: coal mining, shipbuilding, mechanical engineering

sunk·en (sʌnkən) alt *past part.* of SINK ‖ *adj* below the surrounding level, *a sunken garden* lying at the bottom of an ocean, river etc., *a sunken ship* ‖ appearing as if hollow, *sunken cheeks*

sun·lamp (sʌnlæmp) *n.* an electric lamp which produces ultraviolet radiation used as a substitute for sunlight for therapeutic purposes, or for acquiring a suntan at home

sun lamp a large lamp reflecting light by a parabolic mirror, used on film sets

sun·light (sʌnlait) *n.* the light emanating from the sun

sun·lit (sʌnlit) *adj.* shining in the light of the sun

sunn (sʌn) *n.* sunn hemp [Urdu, Hindi, *san*]

Sun·na, Sun·nah (sunə) *n.* the official tradition of the sayings and deeds of Mohammed held in reverence by most Moslems as supplementary to the Koran [Arab.= way, manner of life]

sunn hemp *Crotalaria iuncea*, fam. *Papilionaceae*, a plant with yellow flowers, grown in the East Indies ‖ the hemplike fiber of this plant, lighter and stronger than jute, and used for ropes, bags etc.

Sun·ni (sʌni:) *n.* a Sunnite [Arab. *sunnī*, lawful]

sun·ni·ly (sʌnili:) *adv.* in a sunny manner

sun·ni·ness (sʌni:nis) *n.* the state or quality of being sunny

Sun·nite (sʌnait) *n.* one of the great majority of Moslems who accept the full Sunna

sun·ny (sʌni:) *comp.* **sun·ni·er** *superl.* **sun·ni·est** *adj.* made bright or warm by the sun ‖ cheerful, *a sunny disposition*

sun parlor, *Br.* sun parlour a room or large porch having glass walls to keep the wind out and let the sunshine in

sun porch a sun parlor

sun-pumped laser (sʌnpʌmpt) crystal laser utilizing solar energy concentrated by a parabolic mirror for pumping into a laser

sun·rise (sʌnraiz) *n.* the appearance of the sun above the horizon in the morning ‖ the time when this happens

sun-room (sʌnru:m, sʌnrum) *n.* a sun parlor

sun·set (sʌnset) *n.* the disappearance of the sun below the horizon at the end of the day ‖ the time when this happens ‖ the visually impressive effects of light, clouds etc. which accompany the disappearance of the sun

sunset laws legislation providing for lifetime limitation on new government agencies, established to curb growth of a bureaucratic establishment

sun·shade (sʌnʃeid) *n.* a parasol ‖ an awning

sun·shine (sʌnʃain) *n.* the light received directly from the sun ‖ the shining of the sun ‖ cheerfulness ‖ a cause of cheerfulness **sún·shin·y** *adj.*

—The three main components of sunshine are: visible radiation or light, ultraviolet radiation, which is a germicidal agent and producer of vitamin D, and infrared radiation, which is a heat-producing element forming half of all solar radiation reaching the earth's surface

sun·spot (sʌnspɔt) *n.* a dark area on the sun consisting of a gray region surrounding a darker central one. Sunspots occur singly and in groups (often pairs), are transient, appear to move steadily, vary widely in size, and are associated with strong magnetic fields (*SUNSPOT CYCLE)

sunspot cycle the roughly periodic variation in the number of sunspots, reaching a maximum, on an average, every 11 years, and accompanied by a reversal of magnetic polarity for the spots in the northern and southern hemispheres, which has not yet been satisfactorily explained. Sunspots are only one form of solar activity (*SOLAR FLARE, *SOLAR PROMINENCE)

sun·stone (sʌnstoun) *n.* aventurine feldspar

sun·stroke (sʌnstrouk) *n.* heatstroke brought about by excessive exposure to the heat of the sun

sun·tan (sʌntæn) **1.** *n.* a tan color of the skin acquired by exposure to the sun or to a sunlamp **2.** *v.t. pres. part.* **sun·tan·ning** *past* and *past part.* **sun·tanned** to acquire such a tan

sun·up (sʌnʌp) *n.* sunrise

Sun Yat-sen (sunjɑtsen) (1866-1925), Chinese revolutionary. He united all the Chinese revolutionary parties under the Kuomintang (1911) and was appointed provisional president of the republic (1911-12) after the fall of the Manchus

sup (sʌp) **1.** *v.t. pres. part.* **sup·ping** *past* and *past part.* **supped** (*old-fash.*) to drink in small mouthfuls **2.** *n.* (*old-fash.*) a small mouthful of liquid [O.E. *supan*]

sup *pres. part.* **sup·ping** *past* and *past part.* **sup-**

ped *v.t.* to have supper [O.F. *soper, super, souper*]

su·per (su:pər) **1.** *n.* (*theater*) a supernumerary actor ‖ (*pop.* and *commerce*) a product of extra quality, size etc. ‖ (*bookbinding*) mull ‖ (*pop.*) a superintendent ‖ a removable upper story of a beehive, where the bees store honey **2.** *v.t.* (*bookbinding*) to reinforce (books) with mull ‖ *adj.* (*pop.*) of high quality [L. *super*, above]

super- (su:pər) *prefix* over, above (as in 'superstructure') ‖ higher in rank or position (as in 'supervisor') ‖ greater in quality, amount or degree (as in 'superabundance') ‖ surpassing all or most others of its kind (as in 'superbomber') ‖ extra, additional (as in 'supertax') ‖ (*biol.*) constituting a category more inclusive than is usual (as in 'superfamily') ‖ (*chem.*) having an unusually large amount of a specified ingredient (as in 'superphosphate') [fr. L. *super* adv. and prep., above, on top of, beyond etc.]

su·per·a·ble (su:pərəb'l) *adj.* surmountable, conquerable [fr. L. *superabilis*]

su·per·a·bound (su:pərəbáund) *v.i.* to be very or too abundant [fr. L.L. *superabundare*]

su·per·a·bun·dance (su:pərəbʌndəns) *n.* the quality or state of being superabundant ‖ an excess [fr. L.L. *superabundantia*]

su·per·a·bun·dant (su:pərəbʌndənt) *adj.* abounding in great or too great quantity [fr. L.L. *superabundans* (*superabundantis*), to superabound]

su·per·ac·ti·nide series (su:pərǽktənaid) *n.* hypothetical heavy elements 122 to 153

su·per·add (su:pərǽd) *v.t.* to add (something) to something that has already been added to [fr. L. *superaddere*]

su·per·al·loy (sú:pərælɔi) *n.* a metal alloy with the capacity to resist high stresses, temperatures, etc.

su·per·an·nu·ate (su:pərǽnju:eit) *v. pres. part.* **su·per·an·nu·at·ing** *past* and *past part.* **su·per·an·nu·at·ed** *v.t.* to cause to retire on pension, esp. because of old age ‖ *v.i.* to become retired, esp. because of old age [back-formation fr. SUPERANNUATED]

su·per·an·nu·at·ed (su:pərǽnju:eitid) *adj.* out-of-date ‖ disqualified from work, usually on a pension, esp. because of old age [fr. Mod. L. *superannuatus*]

su·per·an·nu·a·tion (su:pərænju:éiʃən) *n.* a superannuating or being superannuated ‖ a pension received by a superannuated person [fr. SUPERANNUATE or SUPERANNUATED]

su·perb (supə:rb) *adj.* of the highest quality ‖ magnificent to behold ‖ majestic in size, proportions etc. [fr. L. *superbus*, proud]

Super Bowl annual championship game of winners of American and National Football Leagues; played in January since 1967

su·per·cal·en·der (su:pərkǽləndər) **1.** *n.* a calender consisting of highly polished rollers which impart a smooth, glazed finish to paper etc. **2.** *v.t.* to process with a supercalender

su·per·car·go (sú:pərkɑrgou) *pl.* **su·per·car·gos, su·per·car·goes** *n.* an officer in a merchant ship in charge of cargo and all commercial affairs [alt. of earlier *supracargo* fr Span. *sobrecargo*]

su·per·charge (sú:pərtʃɑrdʒ) *pres. part.* **su·per·charg·ing** *past* and *past part.* **su·per·charged** *v.t.* to force air and/or fuel under pressure into (an internal-combustion engine) to increase its power **sú·per·charg·er** *n.* a mechanism (e.g. a pump or compressor) used to supply an internal-combustion engine with a greater volume of air than is possible at ambient pressures. It is used on most aircraft engines, for high-performance automotive engines etc.

su·per·cil·i·ar·y (su:pərsílɪ:eri:) *adj.* of, relating to, or in the region of the eyebrow [fr. Mod. L. *supercilium*, eyebrow]

su·per·cil·i·ous (su:pərsílɪ:əs) *adj.* showing patronizing disdain [fr. L. *supercilium*, eyebrow]

su·per·class (su:pərklɑs) (*zoology*) a classification ranking between a phylum and a class

su·per·clus·ter (su:pərklʌstər) a large group of galaxies

su·per·con·duc·tiv·i·ty (su:pərkɔndʌktívɪti:) (*phys.*) the property in certain metals (lead, tin, vanadium etc.) and alloys of losing virtually all electrical resistance when cooled below a transition temperature near absolute zero. Practical use of this phenomenon is made esp. in magnetic-computer memory stores

su·per·con·ti·nent (su:pərkɔntənənt) (*geology*)

su·per·cool (su:pərku:l) *v.t.* (*chem.*) to bring to a temperature below the normal transition point for a change of state without this change occurring

supercountry 'SUPERPOWER

su·per·cur·rent (su:pərkʌrənt) *n.* (*electr.*) electrical current running without resistance, as through a metal at or near absolute zero

su·per·dense (su:pərdens) *adj.* (*astron.*) extremely compacted, e.g., a quasar, a black hole

su·per·e·go (su:pəri:gou, su:pəregou) *n.* (*psychoanal.*) the idealized image that a person builds up of himself in response to authority and social pressures. Fundamentally unconscious, it rises to consciousness on critical occasions and serves as a kind of policeman of the personality

su·per·er·o·ga·tion (su:pərerəgeiʃən) *n.* the act or process of doing more than is required by duty or obligation ‖ an instance of this **works of supererogation** (*Roman Catholicism*) the good deeds done, e.g. by saints, over and above those required by God [fr. L.L. *supererogatio* (*supererogationis*)]

su·per·e·rog·a·to·ry (su:pərərɡətɔri:, su:pərərɡətouri:) *adj.* of, relating to, or characterized by supererogation ‖ performed to a degree beyond what is required or promised ‖ (*loosely*) superfluous [fr. M.L. *supererogatorius*]

su·per·fam·i·ly (su:pərfæməli:, su:pərfæmli:) *n.* (*taxonomy*) a classification ranking above a family and regarded as being equivalent to a suborder

su·per·fec·ta (sú:pərfektə) *n.* (*wagering*) a wager in which the first four finishers in a race must be selected in proper order *Cf* PERFECTA, TRIFECTA

su·per·fec·un·da·tion (su:pərfekəndéiʃən, su:pərfi:kəndeiʃən) *n.* the successive fertilization of two or more ova during the same ovulation period

su·per·fe·ta·tion, *Br.* also **su·per·foe·ta·tion** (su:pərfitéiʃən) *n.* (*biol.*) the successive fertilization of two or more ova of different ovulations in the same uterus, occurring normally in some viviparous fishes ‖ (*bot.*) the fertilization of an ovule by more than one type of pollen [Mod. L. *superfetatio*]

su·per·fi·cial (su:pərfíʃəl) *adj.* of or relating to a surface ‖ not penetrating further than the surface, *superficial cuts* ‖ apparent rather than real, *a superficial resemblance* ‖ without depth of mind, feeling or imagination ‖ (of a unit of measure) square **su·per·fi·ci·al·i·ty** (su:pərfiʃi:ǽlɪti:) *n.* **su·per·fi·cial·ly** *adv.* [fr. L. *superficialis*]

su·per·fi·cies (su:pərfíʃi:i:z / su:pərfíʃi:eiz) *pl.* **su·per·fi·cies** *n.* a surface [L. fr. *super*, above + *facies*, the face]

su·per·fine (su:pərfain) *adj.* extremely fine

su·per·fluid·i·ty (su:pərflu:íditi:) *n.* the quality or state of being superfluous ‖ a copious oversupply (esp. *pl.*) something superfluous [O.F. *superfluite*]

su·per·flu·ous (supə:rflu:əs) *adj.* being more than is needed, *superfluous words* ‖ not needed, unnecessary, *a superfluous remark* [fr. L. *superfluus*]

superfocetation 'SUPERFETATION

su·per·grade (su:pərgreid) *n.* U.S. Government employment status higher than the highest basic status

su·per·heat **1.** (su:pərhi:t) *v.t.* (*chem.*) to bring to a temperature above the normal transition point for a change of state without this change occurring, esp. to bring (water) to a temperature above its boiling point without boiling taking place ‖ to heat (esp. a vapor) not in contact with its liquid to keep it free from suspended liquid droplets, *superheated steam* **2.** (su:pərhi:t) *n.* the amount by which a vapor is superheated

su·per·heat·er *n.* an apparatus for superheating steam

superheavy *adj.* (*chem.*) (of elements) with a mass greater than known elements, e.g. hafnium

su·per·het·ero·dyne (su:pərhetərədain) *n.* (*radio*) a widely employed system of radio reception in which the incoming signal is converted to a fixed intermediate carrier signal for a radio frequency amplifier. The intermediate carrier signal permits more efficient amplification and precise tuning of the amplifier circuit to the locally produced beat frequency, the system resulting in a sensitive and selective radio receiver **2.** *n.* (*radio*) such a receiver [fr. SUPER-(SONIC) + HETERODYNE]

su·per·high·way (su:pərháiwei) *n.* an expressway, freeway, turnpike or other main road for high-speed driving

su·per·hu·man (su:pərhju:mən) *adj.* beyond normal human capacity or power, *superhuman strength* ‖ supernatural, *superhuman intervention* ‖ [M.L. *superhumanus*]

su·per·im·pose (su:pərimpouz) *pres. part.* **su·per·im·pos·ing** *past* and *past part.* **su·per·im·posed** *v.t.* (of, on, upon) to put (one thing) upon another, *to superimpose speech on recorded music* **su·per·im·po·si·tion** (su:pərimpəziʃən) *n.* a superimposing or being superimposed

su·per·in·cum·bent (su:pərinkʌmbənt) *adj.* lying on something else ‖ (of pressure) exerted from above [fr. L. *superincumbens* (*superincumbentis*) fr *superincumbere*, to lie on]

su·per·in·tend (su:pərintend) *v.t.* to direct the execution of (e.g. a job of work) ‖ to have charge of (a group of people) [fr. eccles. L. *superintendere*]

su·per·in·tend·ence (su:pərintendəns) *n.* the act or function of superintending **su·per·in·tend·en·cy** *n.* the office, rank or jurisdiction of a superintendent ‖ superintendence [fr. M.L. *superintendentia*]

su·per·in·tend·ent (su:pərintendənt) *n.* a person who superintends ‖ the head of a police department ‖ the custodian of a building ‖ (*Br.*) a police officer ranking just above an inspector [eccles. L. *superintendens* (*superintendentis*) fr *superintendere*]

su·pe·ri·or (supiəri:ər) **1.** *adj.* high or higher in position, rank, status etc. ‖ better in quality, worth, ability etc. ‖ greater in value, amount, power etc. ‖ showing that one thinks oneself better than others, *a superior smile* ‖ (*astron.*) farther from the sun than the earth, *a superior planet* ‖ (*bot.*) growing or arising from another part or organ ‖ (*anat.*) situated above a like part or organ, or above the normal position ‖ (*printing*, of a character) placed above the line of type, e.g. '3' in 'a^3' **2.** *n.* a person who is superior in rank or authority ‖ a person who controls a religious community ‖ (*printing*) a superior character **su·pe·ri·or·i·ty** (supiɔri:ɔriti:, supiəri:ɔriti:) *n.* [O.F.]

superiority complex a neurotic condition resulting from overcompensation for feelings of inferiority to others

Superior, Lake the most northwesterly of the Great Lakes of North America, and one of the world's largest sheets of fresh water (area 31,820 sq. miles, maximum depth 1,180 ft). It is bounded in the W. by Minnesota and Wisconsin, in the S. by Michigan, and in the E. by Ontario, and is joined to Lakes Michigan and Huron by the St. Mary River. Part of the St. Lawrence Seaway system, it carries a large volume of grain and iron ore between Lake Michigan and Thunder Bay, Ontario, and Duluth, Minnesota

su·per·jet (su:pərdʒet) *n.* a supersonic jet aircraft

superlative the quality indicated by the adjective or adverb in the highest degree (usually by the addition of 'est' or by the use of 'most' with the positive form) **2.** *n.* the highest degree of something, someone or something superlative (*gram.*) the superlative degree of comparison (*gram.*) a word in the superlative degree **3.** *adj.* (*gram.*) in the superlative degree **4.** *adj.* exaggerated language [O.F. *superlatif*]

supermen

supermolecule (su:pərmɔlikju:l) *n.* (*chem.*) a complex molecule formed by the association of two or more molecules, e.g., an enzyme, a polymer, a protein

supermolecular *adj.*

supermultiplet (su:pərmʌltiplət) *n.* (*nuclear phys.*) a group consisting of smaller groups of nuclear particles

su·per·nal (supə:rn'l) *adj.* (*rhet.*) pertaining to a celestial realm [O.F.]

su·per·na·tant (su:pərneit'nt) *adj.* floating on the surface (e.g. of a clear liquid above a precipitate) [fr. L. *supernatans* (*supernatantis*) fr. *supernatare*, to float]

su·per·nat·u·ral (su:pərnætʃərəl) **1.** *adj.* not able to be explained in terms of the known laws which govern the material universe, *a supernatural phenomenon* **2.** *n.* (with 'the') that realm of experience which is inexplicable in terms of the known laws of nature ‖ a supernatural ‖ being, force etc. **su·per·nat·u·ral·ism** *n.* the quality or state of being supernatural belief in the supernatural **su·per·nat·u·ral·ist** *n.* **su·per·nat·u·ral·is·tic** *adj.* **su·per·nat·u·ral·ize** *v.t. pres. part.* **su·per·nat·u·ral·iz·ing** *past* and *past part* **su·per·nat·u·ral·ized** to make supernatural ‖ to treat as supernatural [fr. M.L. *supernaturalis*]

su·per·no·va (su:pərnouvə) *n.* (*astron.*) a nova with the brightness of many millions of suns, occurring very rarely ‖ a star that has exhausted its nuclear fuel, collapsed into a superdense state, and exploded with a final burst of enormous energy, releasing in one second an energy equivalent to that released by the sun in 60 years [Mod. L. fr. *super-*, above + NOVA]

su·per·nuke (su:pərnu:k) *n.* (*slang*) a technical adviser in a nuclear energy plant

su·per·nu·mer·ar·y (su:pərnu:mərəri:, su:pərnju:mərəri:) **1.** *adj.* above the prescribed number, extra ‖ superfluous **2.** *pl.* **su·per·nu·mer·ar·ies** *n.* a supernumerary person or thing ‖ a person employed for use as need directs rather than for regular service ‖ (*theater*) an actor having a small part, e.g. in a crowd scene [fr. L.L. *supernumerarius*]

su·per·or·der (su:pərɔ:rdər) *n.* (*taxonomy*) a classification ranking between an order and a class or subclass

su·per·o·vu·late (su:pərɔvjuleit) *v.* to produce more eggs at one time than is normal —**super·ovulation** *n.*

su·per·phos·phate (su:pərfɔsfeit) *n.* any of various commercial phosphate fertilizers obtained by acidulating ground, insoluble phosphate rock

su·per·plas·tic (su:pərplæstik) *adj.* of the ability to change form easily under heat or other treatment —**superplasticity** *n.*

su·per·pose (su:pərpouz) *pres. part.* **su·per·pos·ing** *past* and *past part.* **su·per·posed** *v.t.* to place over, or upon, something else ‖ (*geom.*) to place (a figure) over another so that like parts of each coincide [F. *superposer*]

su·per·po·si·tion (su:pərpəziʃən) *n.* a superposing or being superposed (PRINCIPLE OF SUPERPOSITION) [F.]

su·per·po·tent (su:pərpoutənt) *adj.* having exceptional power

sur·re·al·ism (sərí:əlizəm) *n.* a movement in art and literature originated in Paris (1924) by Breton. Formulated at a time when psychoanalysis was gaining ground, surrealism aimed to liberate into the creative act the image-forming powers of the unconscious and so transcend reality as it is conceived by the day-to-day intelligence. Surrealism emerged out of dada, and it claimed writers, including de Quincey, Rimbaud and Lautréamont, as its precursors. It found direction and method in Breton's manifestos and his development of automatism, and it was furthered in the writings esp. of Eluard, Aragon and Prévert. Painters inspired by de Chirico portrayed unconscious or dream images. Masson, Ernst, Arp and Miró developed abstract forms symbolizing unconscious thought. Duchamp produced objects with symbolic significance, and Picabia, Chagall, Picasso and Giacometti all participated in surrealist exhibitions. Dali and Buñuel produced a surrealist film, 'Le Chien Andalou' (1928). Surrealism, which also became philosophical and political, ceased to be a formal group or school, but has been influential as a liberating force. Monetary unit: krona (100 ore). HISTORY. The inhabitants of Sweden, probably of Germanic origin, established trading links with the rest of Europe in the Iron Age. The chief tribes were the Svear in central Sweden and the Goths in the south. They took part in Viking raids (8th-10th cc.), esp. those toward Russia. Christianity was introduced (9th c.) by St Ansgar, but did not spread widely until the reign (1150-60) of Eric IX. England was conquered and Christianized (mid-12th c.). Many Swedish towns gained wealth and power under the influence of the Hanseatic League (13th c.). Stockholm emerged as the capital (mid-13th c.). Margaret elected queen of Sweden in [illegible] united the kingdom with Denmark and Norway by the Union of Kalmar (1397). Denmark proved unable to impose its rule on Sweden, and after many rebellions, Sweden broke away (1523) under Gustavus I. He established his rule over the whole country, except [illegible], which remained under Danish rule, encouraged industry and trade, organized an army and navy, and made Lutheranism the state religion. His successor, Eric XIV, continued the struggle with Denmark and conquered Estonia (1561). Sweden was briefly united with Poland under Sigismund III before he was deposed (1599). Gustavus II and his minister Oxenstierna made Sweden a dominant European power and leader of the Protestant cause in the Thirty Years' War, at the end of which Sweden gained Pomerania and Bremen (1648). Denmark was forced to cede the south of Sweden (1660). Under Charles XII, Sweden was involved in the Northern War (1700-21), in which, despite early victories, it lost all its German and Baltic territories except Finland. Sweden abandoned its ambition of dominating the Baltic, the nobility increased its power at the expense of the monarchy, and the cultural revival (which included the work of Celsius, Swedenborg and Linnaeus) ensued (18th c.). Gustavus III restored royal authority (1771-92). Under Charles XIII Sweden was involved in the Napoleonic Wars in which it lost Finland (1809), but this was compensated by a union with Norway (1814). Bernadotte succeeded to the throne (1818) as Charles XIV. The 19th c. saw the growth of parliamentary government and of industrialization. Hostility toward Norway grew, and the two countries were separated (1905). During the long reign (1907-50) of Gustavus V, Sweden remained neutral in both world wars. Socialist governments carried out much social legislation. Sweden joined the U.N. (1946) and maintained its strictly neutral foreign policy. A new constitution was adopted (1975). Charles XVI Gustav became king (1973) on the death of Gustav VI Adolf. Prime Minister Olof Palme was assassinated (1986).

He was the first to ship dressed beef from Chicago to the east coast, to sponsor the creation of a refrigerator car, and to develop beef by-products (incl. margarine, soap, glue and fertilizer)

Swift, Jonathan (1667-1745), Irish satirist. He was dean of St. Patrick's Cathedral, Dublin. 'Gulliver's Travels' (1726) is a universal satire, with the particular themes of courtly life, politics, academicism and mankind in general, but the public took it as fiction, and it has become a children's classic. His other works include 'A Tale of a Tub' (1704), a brilliant satire on the history of the Christian religion, 'The Battle of the Books' (1704), and the pathetic 'Journal to Stella'. In his own time Swift was an active though embittered politician, and his 'Drapier's Letters' (1724) had an immediate and decisive political effect. Swift's genius is flawed by a basic horror of human life: a horror that tends to impart a sense of terror and disequilibrium to his greatest works, as in 'The Modest Proposal' (1729) or the conclusion of 'Gulliver's Travels'

There are seven universities, the oldest being Basle (1460), Lausanne (1537) and Geneva (1559). Monetary unit: Swiss franc (100 rappen or centimes). HISTORY The region was inhabited by the Helvetii, a Celtic tribe, when it was conquered (58 B.C.) by the Romans. It was overrun by the Alemanni, the Burgundians and the Franks (5th–6th cc.). It was divided (9th c.) between Swabia and Burgundy, but was reunited (1032) as part of the Holy Roman Empire. By the 13th c. it had become split into a number of feudal principalities, many of them dominated by the houses of Hapsburg and Savoy. To meet the threat of Hapsburg domination the cantons of Schwyz, Unterwalden and Uri formed a defensive league (1291), defeated an Austrian army (1315), and were joined by Lucerne (1332), Zurich (1351), Glarus and Zug (1352) and Bern (1353). This Swiss Confederation defeated Charles the Bold of Burgundy and Emperor Maximilian I, and was recognized as independent (1499). More cantons joined the confederation, raising the number to 13 by 1513. After being defeated by the French (1515) in the Italian Wars, the cantons adopted a policy of permanent neutrality (1516), though many Swiss mercenaries continued to serve other countries. The Reformation, preached by Zwingli and Calvin, was widely adopted by the urban areas (16th c.), which were intermittently at war with the rural cantons until 1712. Swiss independence was formally recognized by the Treaties of Westphalia (1648). Switzerland lost political importance (18th c.) but prospered as a financial and intellectual center. The French established the Helvetic Republic (1798–1803), but Napoleon reestablished the confederation of cantons. The Congress of Vienna (1814–15) guaranteed Swiss independence and neutrality. After a short civil war (1847) between radicals and the Sonderbund, a new constitution made Switzerland a federal state (1848). Industry and communications were developed (late 19th c.). Switzerland gained importance as the headquarters of various international organizations (11% of the population are non-Swiss) and as an international financial center. It remained neutral in both world wars and after World War II it concentrated on maintaining its neutrality, improving education and welfare programs and developing its economy into one of the world's richest

sym·bol·ism representation by symbols ‖ a system of symbols symbolic meaning **Sym·bol·ism** the theories and practices of [illegible] of Europe in the late 19th and early 20th cc. in reaction to naturalism and realism. Complex and deliberately planned, a Symbolist work was to express perfectly an intention on the part of the artist and create in the mind of the reader the exact equivalent. Mallarmé defined it as the recovering for poetry of the power of music, which communicated more subtly and precisely than any language could. Hence Symbolist poetry made use of the nonliteral, figurative powers of language: tone, association and metaphor. It became an art of elaborate structure, developing an image or network of images which caused the dislocation of normal syntax. Though this 'pure' symbolism is peculiar to Mallarmé and Valéry, it was prefigured by Laforgue and others and there are elements of it in such diverse writers as Hopkins, Eliot, Proust and Joyce. In music Symbolism is typified by Debussy, in drama by Maeterlinck, and its impact is felt in many Impressionist paintings

syn·a·loe·pha, syn·a·le·pha (sɪnəlí:fə) *n.* (*gram.*) the blending of two syllables into one, esp. by suppressing the final vowel of the first, e.g. 'th' unknown' for 'the unknown' [L.L. fr. Gk fr. *sunaleiphein*, to coalesce, melt together]

syn·an·thro·py (sɪnænθroupɪ:) *n.* of the ecology in which human beings exist —**synanthropic** *adj.*

syn·apse (sɪnæps, sɪnæps) *n.* (*physiol.*) the region at which a nervous impulse passes from one nerve cell to another, formed by the contact of processes of the two cells and responsible for the selection and propagation of nerve impulses characteristic of developed central nervous systems (*ACETYLCHOLINE) [fr. Gk *sunapsis*, junction]

syn·ap·sis (sɪnæpsɪs) *pl.* **syn·ap·ses** (sɪnæpsi:z) *n.* (*biol.*) the process characteristic of the prophase of the first meiotic division in which the chromosomes, without prior splitting, join in pairs, corresponding chromosomes from each parent being associated ‖ synapse [Mod. L. fr. Gk *sunapsis*, junction]

syn·ap·to·ne·mal (sɪnæptəni:məl) *n.* (*genetics*) ribbon-shaped structures in pairing of chromosomes, believed to take part in the genetic process *also* synaptinemal complex

syn·ar·thro·sis (sɪnɑrθróusɪs) *pl.* **syn·ar·thro·ses** (sɪnɑrθrousi:z) *n.* (*anat.*) a joining of bones by a fibrous tissue which does not permit movement between them [Mod. L. fr. Gk *sunarthrōsis*, a linking together]

syn·carp (sɪnkɑrp) *n.* (*bot.*) a multiple fleshy fruit **syn·car·pous** *adj.* (*bot.*) possessing carpels joined in a compound ovary (e.g. in the tulip) ‖ referring to a syncarp [fr. SYN- + Gk *karpos*, fruit]

synch·ing (sɪnkɪŋ) *n.* synchronization of an onstage entertainer's lip movements to a tape played off-stage *also* lip-synching —**lip-synch** *v.* —**synch** *v.*

syn-chro-cy-clo-tron (sɪŋkrousaɪklətrɒn) *n.* (*phys.*) a device similar to a cyclotron but having an alternating electric field whose frequency may be adjusted to compensate relativistic mass changes. The synchrocyclotron produces particles having energies in the range 10^8–10^7 eV [fr. *synchro-*, synchronous, synchronized + CYCLOTRON]

syn-chro-mesh (sɪŋkrəmeʃ) *n.* an arrangement of gears which synchronizes the driving and driven parts before they engage, eliminating shock and noise when the engagement is made [fr. *synchro-*, synchronous, synchronized + MESH]

syn-chron-ic (sɪŋkrɒnɪk, sɪnkrɒnɪk) *adj.* synchronous ‖ (*linguistics*) of or describing the structure of a language at one particular time (opp. DIACHRONIC) [fr. L.L. *synchronus*]

syn-chro-nism (sɪŋkrənaɪzəm) *n.* the fact or quality of being synchronous ‖ the chronological arrangement of contemporary events, trends, leading figures etc. in different parts of the world or in different aspects of history ‖ a table setting this out [fr. Mod. L. *synchronismus* fr. Gk]

syn-chro-nis-tic (sɪŋkrənɪstɪk) *adj.* synchronous

syn-chro-ni-za-tion (sɪŋkrənɪzeɪʃən) *n.* a synchronizing or being synchronized

syn-chro-nize (sɪŋkrənaɪz) *pres. part.* **syn-chro-niz-ing** *past* and *past part.* **syn-chro-nized** *v.i.* to occur at the same time ‖ to proceed at the same rate ‖ *v.t.* to cause to occur at the same time or to proceed at the same rate ‖ to regulate so as to agree in time, *to synchronize watches* ‖ to put (events) at the same date or time ‖ (*movies*) to adjust (sounds) with the action ‖ to adjust (the shutter of a camera) so that the flashbulb goes off when the shutter opens [fr. Mod. L. *synchronismus* fr. Gk *sunchronizein* fr. *sunchronos*, contemporary]

synchronized swimming sport in which competitors perform gymnastic maneuvers, ballet, circular swimming, underwater somersaults *also* water ballet

syn-chro-nous (sɪŋkrənəs) *adj.* existing or occurring at the same time ‖ exactly coinciding in time, rate etc. ‖ (*phys.*) having the same phase and period [fr. L.L. *synchronus* fr. Gk]

synchronous orbit (*aerospace*) path of a communications relay station satellite that is traveling at the same speed as the earth, the satellite thus appearing to remain over one point on earth —**synchronous satellite** *n.*

syn-chro-tron (sɪŋkrətrɒn) *n.* (*phys.*) any of several particle accelerators utilizing some combination of frequency modulated alternating electric fields (as in the synchrocyclotron) for accelerating the particles and using specially designed focusing magnetic fields (as in the betatron) for maintaining stable orbits. Synchrotrons can be used to accelerate positively charged or negatively charged particles and produce particles with energies in the range 10^{10}–10^{12} eV [fr. *synchro-*, synchronous, synchronized + Gk *-tron*, instrument]

synchrotron radiation (*phys.*) radiation emitted by celestial bodies conceived as orbiting in and accelerated by a magnetic field similar to a vast synchrotron

syn-clas-tic (sɪnklǽstɪk) *adj.* (of a surface, e.g. the surface of a sphere) having the same curvature in all directions around any given point (opp. ANTICLASTIC) [fr. SYN- + Gk *klastos*, broken]

syn-cli-nal (sɪnkláɪn'l) *adj.* (*geol.*) of strata which dip towards a common point or line (opp. ANTICLINAL) **sýn-cline** *n.* (*geol.*) such an arrangement of strata (opp. ANTICLINE) [fr. Gk *sun*, syn- + *klinein*, to incline together]

Syncom *n.* any of several U.S. communications relay satellite placed in synchronous equatorial orbit

syn-co-pate (sɪŋkəpeɪt, sɪnkəpeɪt *pres. part.* **syn-co-pat-ing** *past* and *past part.* **syn-co-pat-ed** *v.t.* to shorten (a word) by syncope ‖ (*mus.*) to shift the regular accent in (a composition) to a normally unaccented beat **syn-co-pá-tion** (sɪŋkəpéɪʃən) *n.* a syncopating or being syncopated ‖ (*gram.*) syncope ‖ syncopated rhythm [fr. L.L. *syncopare* (*syncopatus*), to affect with syncope]

syn-co-pe (sɪŋkəpi:, sɪnkəpi:) *n.* (*gram.*) the shortening of a word by dropping sounds or syllables from the middle of it ‖ loss of consciousness due to a sudden transient failure of blood supply to the brain [fr. L.L. fr. Gk fr. *sun* together + *koptein* to cut off, cut short]

syn-cret-ic (sɪŋkrétɪk, sɪnkrétɪk) *adj.* syncretistic

syn-cre-tism (sɪŋkrətɪzəm, sɪnkrətɪzəm) *n.* attempted reconciliation of conflicting or opposite beliefs, e.g. in philosophy or religion, esp. uncritically ‖ the development of a religion by the subsuming of older forms ‖ perception in which incompatible elements are fused, e.g., in dreams ‖ (*gram.*) the fusion into one of two or more differently inflected grammatical forms of a word **syn-cre-tist** *n.* **syn-cre-tís-tic** *adj.* of or relating to syncretism or to a syncretist [fr. Mod. L. *syncretismus* fr. Gk]

syn-cre-tize (sɪŋkrɪtaɪz, sɪnkrɪtaɪz) *pres. part.* **syn-cre-tiz-ing** *past* and *past part.* **syn-cre-tized** *v.t.* to unite or attempt to unite (conflicting tenets), esp. without critical understanding ‖ *v.i.* to become fused or united ‖ to practice syncretism [fr. Mod. L. *syncretizare* fr. Gk]

syn-dac-tyl, syn-dac-tyle (sɪndæktɪl) **1.** *adj.* (of some birds and some mammals) having two or more digits wholly or partly united **2.** *n.* a bird or mammal having syndactyl digits **syn-dác-tyl-ism** *n.* [fr. SYN- + Gk *daktulos*, finger]

syn-des-mo-sis (sɪndesmóusɪs) *pl.* **syn-des-mo-ses** (sɪndesmóusi:z) *n.* (*anat.*) an articulation of joints in which the bones are united by a ligament **syn-des-mot-ic** (sɪndesmɒtɪk) *adj.* [Mod. L. fr. Gk *sundesmos*, ligament]

syn-det-ic (sɪndétɪk) *adj.* (*gram.*) serving to connect [fr. Gk *sundetikos* fr. *sundein*, to bind together]

syn-dic (sɪndɪk) *n.* an official, esp. one who manages the business matters of a university or other corporation **sýn-di-cal** *adj.* [fr. F. fr. L.L. fr. Gk]

syn-di-cal-ism (sɪndɪk'lɪzəm) *n.* a political and economic theory advocating the use of general strikes and force by the workers to enable them to overthrow parliamentary government and establish a dictatorship of the proletariat, in which the means of production would be controlled by the trade unions. The theory, allied to anarchism, originated in France in the 19th c. **syn-di-cal-ist** *adj.* and *n.* [fr. F. *syndicalisme*]

syn-di-cate 1. (sɪndɪkɪt) *n.* a body of syndics ‖ a group of persons or firms authorized jointly to promote some common interest ‖ a chain of newspapers ‖ an organization selling feature stories, cartoons etc. to several newspapers or magazines for simultaneous publication **2.** (sɪndɪkeɪt) *v. pres. part.* **syn-di-cat-ing** *past* and *past part.* **syn-di-cat-ed** *v.t.* to join together to form a syndicate ‖ *v.t.* to control as or form into a syndicate ‖ to sell (feature stories etc.) to several newspapers or magazines for simultaneous publication **syn-di-cá-tion** *n.* [fr. F. *syndicat* fr. M.L.]

syn-drome (sɪndroum) *n.* a group of disease symptoms commonly found in association with one another ‖ a number of disparate things regarded as an associated group [Mod. L. fr. Gk *sundromē*, a running together]

syn-ec-do-che (sɪnekdəki:) *n.* the rhetorical device by which the part is taken for the whole ('so much a head' instead of 'so much per person'), the whole for the part, the genus for the species, the species for the genus, the matter for the thing made of it etc. [L.L. fr. Gk *sunekdochē*, a receiving together]

syn-ec-tics (sɪnéktɪks) *n.* method of stating and solving problems through analogy by brain storming, utilizing persons of diverse back- [illegible] **syn-ec-tic** *adj.* **syn-ec-ti-cally** *adv.*

syn-er-e-sis, syn-aer-e-sis [illegible] *n.* (*prosody*) the contraction of two like vowels into a single syllable, esp. so as to form a diphthong (opp. DIAERESIS) ‖ synizesis [Mod. L. fr. Gk *sunairesis*, a talking together]

syn-er-gism [illegible] **syn-er-gis-tic** [illegible] **syn-er-gis-ti-cally** [illegible] **syn-er-gis-tic-ness** [illegible] **syn-er-gis-tics** [illegible] **syn-er-gy** [illegible] **syn-er-gy-nid** [illegible] **syn-er-gis

synoptic chart a meteorological map presenting data and analyses which describe weather conditions over a large area at a given moment in time

Syn·op·tist (sinɔptist) *n.* an author of one of the Synoptic Gospels

syn·o·vi·a (sinóuvi:ə) *n.* the fluid produced by the transparent internal lining membrane of joints, acting as a lubricant **syn·ó·vi·al** *adj.* of or secreting synovia **syn·o·vi·tis** (sinəváitis) *n.* inflammation in a synovial membrane [Mod L]

syn·tac·tic (sintæktik) *adj.* syntactical **syn·tác·ti·cal** *adj.* of or relating to syntax or in accordance with the rules of syntax [fr. Mod. L. *syntacticus* fr. Gk]

syn·tax (sintæks) *n.* the arrangement of words in a sentence showing their constructional relationship ‖ the branch of grammar concerned with this [fr. F. *syntaxe* fr. L.L. fr. Gk]

syn·thase (sinθeis) *n.* (*biochem.*) any synthetic enzyme used in catalysis

syn·the·sis (sínθisis) *pl.* **syn·the·ses** (sinθisi:z) *n.* (*logic*) a method of demonstration which consists in reasoning from self-evident propositions, laws or principles to arrive by a series of deductions at what one seeks to establish ‖ an exposition assembling the various parts into a whole, *a historical synthesis* ‖ (*chem.*) the formation of a compound from elements or simpler compounds **syn·the·sist** *n.* **syn·the·size** (sinθisaiz) *v.t. pres. part.* **syn·the·siz·ing** *past* and *past part.* **syn·the·sized** to form into a whole by synthesis ‖ (*chem.*) to produce (e.g. an organic compound) by synthesis [L. fr. Gk *sunthesis*, a putting together, composition]

syn·the·tase (sinθəteis) *n.* (*biochem.*) a catalytic enzyme that causes the formation of nucleoside monophosphate or diphosphate from nucleoside triphosphate *also* ligase

syn·the·siz·er (sinθəsaizər) *n.* (*electr.*) a device that creates complex entities of simple sound or frequency elements, e.g., a voice synthesizer in a computer

syn·thet·ic (sinθétik) **1.** *adj.* relating to or involving synthesis produced by synthesis ‖ artificial, man-made, *synthetic fibers* ‖ using inflections or affixes to express syntactical relationships **2.** *n.* a synthetic product, e.g. nylon **syn·thét·i·cal·ly** *adv.* [fr. F. *synthétique* or Mod L. *syntheticus* fr. Gk]

synthetic foam a strong, pressure-resistant plastic containing air cells to reduce weight in packing

synthetic fur fun fur (which see)

syn·the·tize (sínθitaiz) *pres. part.* **syn·the·tiz·ing** *past* and *past part.* **syn·the·tized** *v.t.* to synthesize

syph·i·lis (sífəlis) *n.* a chronic, often congenital venereal disease, caused by the spirochete *Treponema pallidum*. If untreated the disease may result in the degeneration of many organs and tissues of the body **syph·i·lit·ic** (sifəlitik) *n.* and *adj.* [Mod. L. after 'Syphilis sive Morbus Gallicus', a poem by Girolamo Fracastoro (1483–1553)]

sy·phon, si·phon (saifən) *n.* a bottle holding a tube fitted at the top with a valve which when opened allows the carbonated water in the bottle to be ejected [fr. L. *sipho* (*siphonis*), tube, pipe fr. Gk]

Syr·a·cuse (sírəkju:s) a city (pop. 170,105) in central New York State: chemicals, car parts, electrical appliances, mechanical engineering University (1870)

Syr·a·cuse (*Ital.* Siracusa) a port (pop. 89,000) in S.E. Sicily: Greek theater (5th c. B.C.) and temples, Roman amphitheater. Castle (13th c.), baroque cathedral (17th-18th cc.), palaces. Syracuse was founded as a Greek colony (8th c. B.C.), defeated an attack by Athens (415-413 B.C.) and was sacked (212 B.C.) by the Romans

Syr-Dar·ya (si:rdarjə) (ancient Jaxartes) a river (1,370 miles long, navigable along its middle course) formed in the Ferghana Valley by streams from the Tien Shan and Altai Mtns, and flowing north through Uzbekistan, Tadzhikistan and Kazakhstan, U.S.S.R., to the Aral Sea

Syr·i·a (sírijə) a republic (area 71,210 sq. miles, pop. 8,979,000) in W. Asia. Capital: Damascus. People: 90% Arab, small Turkish, Turkoman, Kurdish, Circassian, Armenian and other minorities. Language: Arabic, minority languages. Religion: 72% Sunnites, 11% Shi'ites, 2% Druze, 3% Greek Orthodox, 2% Armenian Orthodox, 2% Roman Catholic, smaller Christian sects, some Jews. The population is 10% nomadic (Beduins). The land is 30% arable, 34% pasture and grazing, and 2% forest. It is largely a plateau (1,000-3,000 ft), with the Ansariyeh Mtns (rising to 5,194 ft) near the northwest coast, the Anti-Lebanon Mtns (*HERMON) on the Lebanon border, Gebel Druse (5,900 ft) in the south, and isolated massifs in the center. The Euphrates basin (1,000-3,000 ft) crosses the northeast. East of the Anti-Lebanon Mtns, the Syrian Desert covers the south. The north is semiarid grassland (livestock, dry cereal culture). Average temperatures (F.) for Jan. and July: Latakia 56° and 81°, Palmyra 46 and 110°, E. Euphrates valley 43° and 90°. Rainfall: Aleppo 15 ins, Damascus 9 ins, coast 20-40 ins, desert under 5 ins. Livestock: sheep, goats, cattle, donkeys, mules, camels. Agricultural products: wheat, rice, other cereals, sugar beets, pulses, fruit, olives, tomatoes, figs, cotton, tobacco, almonds, dairy products. Mineral resources: asphalt, natural gas, bitumen, basalt, building stone, salt. Industries: food processing, soap, cement, tobacco, tanning, textiles, glass, footwear, metalware, wine. Exports: cotton, cereals, silk fabrics, wool, cottonseed, lentils, sheep. Imports: iron and steel, machinery, fuel and oils, silk, wool, wood, vehicles, chemicals. Chief port: Latakia. Universities: Damascus (1924) and Aleppo (1961). Monetary unit: Syrian pound (100 piasters). HISTORY Situated on trade routes between the Mediterranean and Mesopotamia, Syria was settled (3rd millennium B.C.) by Semitic Amorites. Canaanites settled on the coast (2nd millennium B.C.) and the Aramaeans established their capital at Damascus (11th c. B.C.). Parts of Syria were overrun by the Egyptians and the Hittites (18th-10th cc. B.C.), the Assyrians (8th c. B.C.), the Babylonians or Chaldeans (7th c. B.C.) and the Persians (6th c. B.C.). Control passed (333 B.C.) to Alexander the Great, and after his death (323 B.C.) to the Seleucids, under whom Hellenistic culture was introduced. Syria was conquered (63 B.C.) by the Romans under Pompey. It flourished under Roman rule and the south of the country saw the rise of Christianity. Syria passed to the Byzantine Empire (395 A.D.) and was fully converted to Christianity, but was overrun (633-6) by the Arabs and was gradually converted to Islam. Damascus prospered as the capital of the Umayyad caliphate (651-750), but Syria declined when the Abbasids moved the caliphate to Baghdad. The Seljuk Turks and the Mamelukes repelled the Crusades (11th-13th cc.), and the Ottoman Turks established their rule (1516). Syria was invaded by the French (1799), and by the Egyptians (1832) under Ibrahim Pasha, who ruled as governor (1833-9). Arab nationalism began in Lebanon and Syria about the turn of the century, and separatist movements against the Turks were encouraged by Britain and France during the 1st world war. With Lebanon, Syria became a French mandate (1920). The French put down a rebellion (1925-7) with severity. Syria was occupied (1941) by the British and the Free French, and was declared independent (Jan. 1, 1944), but sporadic fighting continued between French and Syrian forces until 1945. Syria joined the Arab League and the U.N. (1945). After a series of coups d'etat, Syria joined the United Arab Republic (1958), but seceded (1961). After further revolts, it sought closer links with the United Arab Republic (1963). A further military coup took place in 1966. Syria joined (1971) the Union of Arab Republics (with Egypt and Lebanon). Syria lost territory on the Golan Heights to Israel during wars (1967, 1973). Syrian troops occupied most of Lebanon (1976) in an effort to end civil war in that country. A military coup (1970) brought Gen. Hafiz al-Assad to power. He was elected president by public referendum (1971) and reelected (1978, 1985)

Syr·i·ac (sirijæk) **1.** *adj.* of, relating to or written in Syriac **2.** *n.* Aramaic ‖ a form of Aramaic spoken by Eastern Christian communities ‖ the liturgical language used by some Eastern Christian Churches (cf. PESHITTA, cf. NESTORIAN CHURCH)

Syr·i·an (sirijən) **1.** *n.* a native or inhabitant of Syria ‖ a member of a Syrian Church **2.** *adj.* of or relating to Syria, its peoples, language, culture etc. ‖ of, relating to or being one of the Eastern Churches using Syriac liturgies, e.g. the Nestorian Church

Syrian Desert (*Arab.* Hamad) a desert region covering most of S. Syria and S.W. Iraq, and adjoining regions of Jordan and Saudi Arabia

sy·rin·ga (sirijgə) *n.* a member of *Philadelphus*, fam. *Saxifragaceae*, a genus of shrubs of temperate regions having strong-scented white flowers [Mod. L. fr. Gk *surinx* (*suringos*), shepherd's pipe]

sy·ringe (sirindʒ, sirindʒ) **1.** *n.* a piston-fitted hand cylinder, or a rubber bulb with a nozzle, into which a liquid is sucked and then ejected in a stream for cleansing, spraying or injecting **2.** *v.t. pres. part.* **sy·ring·ing** *past* and *past part.* **sy·ringed** to inject, cleanse etc. with a syringe [fr. M.L. *siringa*, *siryngа*]

sy·rin·ge·al (sirindʒi:əl) *adj.* of or relating to the syrinx

syr·inx (síriŋks) *pl.* **sy·rin·ges** (sirindʒi:z), **syr·inx·es** *n.* a panpipe ‖ the vocal organ of birds [L. fr. Gk *surinx*, a pipe]

Syro- (sírou) *combining form* Syrian and ‖ Syriac and

Sy·ros (sáiros) (or Syra) an island (area 31 sq. miles, pop. 18,642) of the N. Cyclades, containing their chief port, Hermoupolis (pop. 14,000)

syr·up, sir·up (sirəp, sə́rəp) *n.* a thick liquid consisting of a concentrated solution of sugar and water ‖ such a thick liquid with flavoring or some medicinal substance added, *cough syrup* ‖ evaporated juice of sugarcane before crystallization of the sugar, in the process of manufacturing cane sugar ‖ cloying sentimentality **sýr·up·y, sír·up·y** *adj.* [O. F. *sirop, cyrop*]

sys·tal·tic (sistæltik, sistɔ́ltik) *adj.* (*physiol.*, of the heart) characterized by regular contraction and dilatation [fr. L.L. *systalticus* fr. Gk]

sys·tem (sistəm) *n.* an orderly, interconnected, complex arrangement of parts, *the nervous system* ‖ a set of principles linked to form a coherent doctrine, *a philosophical system* ‖ a method of organization, administration or procedure ‖ (*geol.*) a major division of rocks, formed during a period or era, *the Devonian system* ‖ (*astron.*) a group of orbiting heavenly bodies moving about a central body ‖ (*biol.*) a group of bodily organs having the same or similar structure and which act as a unit in performing a vital bodily function, *the circulatory system* ‖ (*biol.*) a method of classification ‖ a set of units permitting the basic measurements to be clearly and simply stated, *the metric system* ‖ calculated orderliness, *to work with system* [fr. L.L. *systema* fr. Gk]

system approach a mathematical approach to the study of the components of a system to define how the system will behave under various circumstances *Cf* SYSTEMS ANALYSIS

sys·tem·at·ic (sistəmætik) *adj.* constituting a system, *a systematic philosophy* ‖ working in accordance with a system, methodical ‖ relating to classification in biology **sys·tem·át·i·cal·ly** *adv.* **sys·tem·at·ics** *n.* the science of classification [fr. L.L. *systematicus* fr. late Gk]

sys·tem·a·tist (sistəmətist) *n.* a taxonomist

sys·tem·a·ti·za·tion (sistəmətizéiʃən) *n.* a systematizing or being systematized

sys·tem·a·tize (sistəmətaiz) *pres. part.* **sys·tem·a·tiz·ing** *past* and *past part.* **sys·tem·a·tized** *v.t.* to make into a system

sys·tem·ic (sistémik) *adj.* of or relating to a system, esp. (*physiol.*) of or relating to the entire bodily system

sys·tem·i·za·tion (sistəmizéiʃən) *n.* systematization

sys·tem·ize (sistəmaiz) *pres. part.* **sys·tem·iz·ing** *past* and *past part.* **sys·tem·ized** *v.t.* to systematize

system levels a set of criteria used to analyze political systems, their efficiency, benefits, problems, etc.

systems analysis the study of an activity to determine objectives and how to accomplish them most efficiently, e.g., procedures for collecting, manipulating, and evaluating computer data to improve control over an operation

systems analyst *n.*

systems engineering a technique of management theory involving rationalistic models of business organizations, based on the interrelation of components and on the input and output of the total system under consideration

sys·to·le (sístəli:) *n.* (*physiol.*) the regular contraction of an organ (e.g. the heart or an artery) by which the blood is driven forward (opp. DIAS-

tole) **sys·tol·ic** (sistɔlik) *adj.* [Mod. L. fr. Gr. *systolē* contraction]

syz·y·gy (sízidʒi:) *pl.* **syz·y·gies** *n.* (*astron.*) a point of conjunction or opposition of a planet, esp. the moon, with the sun [fr. L.L. *syzygia* fr. Gk]

Szczecin (ʃtʃetsí:n) (*G.* Stettin) a port and naval base (pop. 381,000) in Poland on the Oder near its mouth, with shipbuilding, machinery, paper, chemical and metallurgical industries. It includes a free port. Churches (12th and 14th c.)

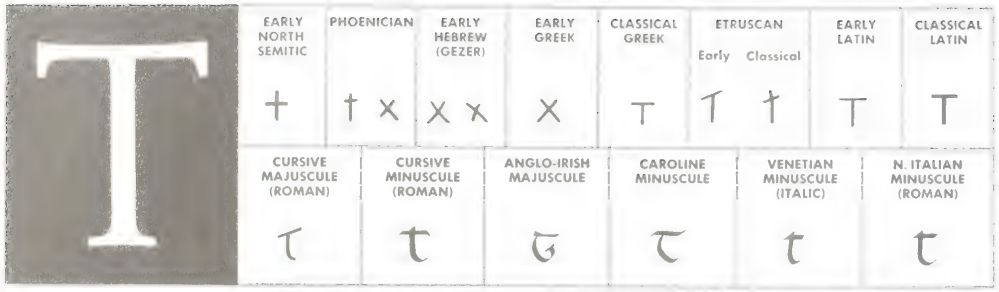
Szechwan [illegible] province, pop. 90,000,000) of western and central China, around the middle Yang-tze-kiang. Capital: Chengtu. It is the largest and most populous province, at the heart of which lies the Red Basin, a rich agricultural region with extensive mineral resources

Sze·ged (séged) a town (pop. 175,700) in S. Hungary on the Tisza. Industries: textiles, food processing. University

Szek·ler (séklər) *n.* the Transylvanian branch of the Magyar people || their dialect of Hungarian, written in its own runic alphabet

Sze·ming [illegible]

Szent-Gyor·gyi (sentdjáardji:), Albert von Nagyrapolt (1893–), Hungarian biochemist. He isolated vitamin C and prepared it in bulk from Hungarian paprika (Nobel prize, 1937)



Development of the letter T, beginning with the early North Semitic letter. Evolution of both the majuscule, or capital, letter T and the minuscule, or lowercase, letter t are shown.

T,t (tiː) the twentieth letter of the English alphabet **to a T** exactly

Tai·wan (táiwún) (Formosa) a republic (area 13,890 sq. miles, pop. 19,157,407) in E. Asia. It is a Pacific island, 90 miles off S.E. China. It includes the Pescadores (Penghu) Islands, and 13 scattered offshore islands, incl. Quemoy and Matsu. Capital: Taipei. People: 98% Chinese, with Japanese and aboriginal minorities. Language: Chinese (Amoy dialect). Japanese is widely spoken. The land is 50% forest and 24% arable. The mud flats and sandbanks of the west coast give way to lowlands, while on the east coast steep cliffs rise to the densely wooded peaks of the Taitung and Chungyang Mtns (highest point 14,000 ft). The monsoons bring up to 290 ins of rain to the northern and southern tips but only 40–60 ins in the west. There are frequent typhoons. Average temperatures (F.): 50°-60° in winter, 80°-90° in summer. Pigs are raised. Taiwan is the world's chief source of camphor. Timber: hardwoods, pine. Minerals: silver, copper, coal, oil. Industries: flour milling, sugar refining, tobacco. Exports: camphor, sugar, bananas and pineapples, coal, tea, rice, gold. Other products: sweet potatoes, tobacco. Imports: vegetables, iron, opium, textiles. Ports: Kaohsiung, Keelung. National Taiwan university. Monetary unit: new Taiwan yuan. HISTORY Chinese immigrants settled the island extensively (15th-17th cc.) and Spanish, Dutch and Portuguese traders visited it (16th and 17th cc.). China annexed the island (1683). It was ceded to Japan (1895) and restored to China (1945). Chiang Kai-shek retreated to the island after his expulsion from the mainland by the Communists (1949) and controls it as president of the National Republic of China. The People's Republic of China considers Taiwan as one of its 22 provinces and the Communists are determined to 'liberate' the island. The Kuomintang government and the U.S.A. signed a pact (1954) under which the U.S.A agreed to protect the republic. After its expulsion from the mainland, the Taiwan government continued to represent China, a founding member, at the U.N., until it was unseated in 1971. In 1975 Chiang Kai-Shek died and vice-president Yen Chia-kan took office as president, although leadership of the Kuomintang passed to Chiang's son Chiang Ching-Kuo. In 1978 the U.S.A. unilaterally terminated its security pact with Taiwan, and U.S.-Taiwan relations have continued to be ambiguous

Tenth Amendment (1791) final amendment in the Bill of Rights of the U.S. Constitution. It provides that powers not delegated to the federal government by the Constitution nor prohibited to the states are reserved to the states or to the people. The amendment was intended to prevent the new national government from usurping the authority of the states. Although the reserved powers are not enumerated in the amendment, they have been understood to include internal matters such as local government, education and regulation of intrastate commerce, labor and business, as well as family concerns such as marriage, divorce and inheritance. Although today the 10th Amendment is not seen as limiting the authority of the federal government, it was cited to curtail powers of Congress in such landmark Supreme Court cases as *Hammer* v. *Dagenhart* (1918) and *Schecter Poultry Corporation* v. *United States* (1935).

A coup d'état (1688) largely cut Siam off from foreign influence. Ayudhya was destroyed (1767) by the Burmese, and the capital was moved to Bangkok (late 18th c.) by the founder of the present ruling dynasty. Thailand was again opened to Western influence (mid-19th c.) and many Western reforms were introduced. France forced Thailand to surrender its claims to Cambodia (1867) and Laos (1893). Kedah, Kelantan, Trengganu and Perlis were ceded to Britain (1909). Thailand joined the Allies (1917) in the 1st world war. A coup d'état (1932) resulted in a constitutional monarchy. After attempting to seize back the regions it had lost to French Indochina, Thailand was invaded by the Japanese (1941-4). It joined the U.N. (1946) and SEATO (1954). A coup d'état (1951) restored the 1932 constitution. Britain, Australia and the U.S.A. contributed to Thailand's defense against Communist [illegible] (1965)

there (ðɛər) **1.** *adv.* in or at that place, *she saw him there* ‖ to or towards that place, *he went there yesterday* ‖ then, at that point, *there he interrupted* ‖ in those circumstances, *there was his chance of escape* ‖ right now, *there goes the bell* **2.** *pron.* used as an introductory word in impersonal constructions, esp. when the verb has no complement, *there were only two left* **3.** *n.* that place, *from there they went south* **4.** *inter.* used to express confirmation, *there, I told you so!* or comfort, *there, you will soon be better* or triumph, *there, it's finished!* [O.E. *thær, ther*]
[illegible] that ‖ (*archaic*) at that place or time
there-a·bout (ðɛərəbaut) *adv.* thereabouts
there-a·bouts (ðɛərəbauts) *adv.* near that place ‖ near to that number, amount etc., *ten pounds or thereabouts* [O.E. *thær, abūtan*]
there·af·ter (ðɛəræftər, ðɛərɑftər) *adv.* after that time or place [O.E. *thæræfter*]
there·by (ðɛərbai) *adv.* thus, by this or that [illegible] **thereby hangs a tale** [illegible]
[illegible]
there·fore (ðɛərfɔr, ðɛərfour) *adv.* for that reason [M.E. *therfore, therefore*]
there·from [illegible] from that, from it [M.E.]
there·in (ðɛərin) *adv.* (*legal contexts*) in that thing, place etc. ‖ (*rhet.*) in that respect, *we don't know all the facts and therein lies our difficulty* [O.E. [illegible]]
there·in·af·ter (ðɛərinæftər, ðɛərinɑftər) *adv.* (*legal contexts*) later in the same document
there·in·be·fore (ðɛərinbifɔr, ðɛərinbifour) *adv.* (*legal contexts*) earlier in the same document
there·of (ðɛərɔv, ðɛərɒv) *adv.* (*legal contexts*) of [illegible]
there·on (ðɛərɔn, ðɛərɒn) *adv.* (*rhet.*) on that thing just mentioned ‖ (*rhet.*) thereupon [O.E. [illegible]]
Theresa (TERESA)
there·to (ðɛərtu:) *adv.* (*legal contexts*) to it, to that, *the condition applying thereto* [O.E. *thær to, thærto*]
there·un·der (ðɛərʌndər) *adv.* (*legal contexts*) under that heading or under the conditions just set out ‖ (*rhet.*) under that thing, place etc. just [illegible]
there·u·pon (ðɛərəpɔn, ðɛərəpɒn) *adv.* immediately after that (*legal contexts*) as a result of that [M.E. *ther upon, ther up on*]
[illegible] mediately after that (*archaic*) with this, that

[illegible]

thermal conductivity (*phys.*) ability to conduct heat ‖ (of a substance) the amount of heat transmitted across a cube of unit volume in unit time when the temperature difference between the faces of the cube is 1° C. (cf. ELECTRICAL CONDUCTIVITY)
thermal diffusion (*phys.*) the separation of the heavy from the light components of a fluid mixture under the influence of a temperature gradient
thermal energy analyzer device used to pinpoint nitrosome concentrations in chemicals; developed by Thermo Electron Corp. *abbr.* TEA
thermal neutron (*phys.*) a neutron of low energy, emitted in the disintegration of some radioactive nuclei, e.g. U^{235}
thermal pollution (*envir.*) industrial disposal of heated liquid into rivers or other natural waters, causing undesirable ecosystemic changes *also* heat pollution
thermal volt *KELVIN
ther·mic (θə:rmik) *adj.* thermal [fr. Gk *thermē*, heat]
Ther·mi·dor (θə:rmidɔr, termidɔr) *n.* (*F. hist.*) the 11th month of the French Revolutionary calendar ‖ the coup d'etat of 9 Thermidor (July 27, 1794) in which Robespierre and his supporters were overthrown and the Terror was ended [F. fr. Gk *thermē*, heat + *dōron*, gift]
therm·i·on (θə:rmaiən) *n.* (*phys.*) an ion produced by heating a substance (usually to incandescence) **therm·i·on·ic** (θə:rmaiɔnik) *adj.* of or operating by means of thermions [fr. Gk *thermos*, hot, *thermē*, heat + ION]
thermionic tube (*electr.*) device that emits electrons from a hot metal cathode, e.g., electron gun in a cathode-ray tube, precursor of the transistor
ther·mis·tor (θə:rmistər) *n.* an electrical resistor whose resistance is a known, rapidly varying function of temperature. Thermistors are made usually of rare-earth and certain other metallic oxides, and are used esp. as thermometers and in katharometers [fr. THERMAL + RESISTOR]
ther·mit (θə:rmit) *n.* thermite
ther·mite (θə:rmait) *n.* a mixture of aluminum powder and a metallic oxide (usually iron oxide), which yields molten iron, alumina and large quantities of heat when ignited by a magnesium fuse. It is used in welding and in incendiary bombs [fr. *Thermit*, a trademark]
thermo- (θə:rmou) *prefix* heat ‖ thermoelectric [Gk fr. *thermos*, hot, *thermē*, heat]
ther·mo·chem·is·try (θə:rmoukémistri:) *n.* the study of the heat relations in chemical changes
ther·mo·cou·ple (θə:rmoukʌp'l) *n.* (*phys.*) a device, consisting of two dissimilar metallic conductors in contact, that produces an electrical current whose magnitude depends on the temperature of the junction. It is used to measure temperature and in thermopiles (*SEEBECK EFFECT)
ther·mo·dy·nam·ic (θə:rmoudainæmik) *adj.* pertaining to thermodynamics **ther·mo·dy·nám·ics** *n* the branch of physics dealing with the relation between heat and other forms of energy (*LAW OF THERMODYNAMICS)
ther·mo·e·lec·tric (θə:rmouiléktrik) *adj.* of or relating to thermoelectricity **ther·mo·e·lec·tri·cal** *adj*
thermoelectric effects *JOULE EFFECT, *PELTIER EFFECT, *SEEBECK EFFECT, *THOMSON EFFECT
ther·mo·e·lec·tric·i·ty (θə:rmouilektrísiti:, θə:rmouelektrísiti:) *n.* electrical energy produced by the action of heat, e.g. in the Seebeck and other thermoelectric effects
ther·mo·form (θə:rməfɔrm) *n.* process of molding plastics (for packaging) by using heat — **thermoform** *v.* —**thermoformable** *adj*
ther·mo·gen·e·sis (θə:rmoudʒénisis) *n.* (*biol.*) the production of heat by the oxidation of foodstuffs in the body, or by other physical or chemical changes within the body
ther·mo·ge·net·ic (θə:rmoudʒənetik) *adj.* of thermogenesis [fr. Gk *thermē*, heat + GENETIC]
ther·mo·gen·ic (θə:rmoudʒénik) *adj* of or relating to thermogenesis [fr. THERMO + Gk *-genes*, born of]
ther·mo·graph (θə:rməgræf, θə:rməgraf) *n.* a recording thermometer, used chiefly by meteorologists
ther·mog·ra·phy (θə:rmɔgrəfi:) *n.* **1.** raised-printing process in which resin dusts are used to raise lettering, imitating copperplate engraving **2.** (*med.*) technique of body-heat measurement used for early detection of cancer cells, which tend to have an elevated temperature **3.** technique for measuring temperatures of distant surfaces —**thermogram** *n.* the product —**thermograph** *n.* the apparatus —**thermograph** *v.*
ther·mo·gra·vim·e·try (θə:rməgrəvíimətri:) *n.* the measurement of changes in weight due to temperature change —**thermogravimetric** *adj*
ther·mo·la·bile (θə:rmouléibil) *adj.* (*biochem.*) unstable, i.e. losing its characteristic properties, when heated (opp. THERMOSTABLE)
ther·mom·e·ter (θərmɔmitər) *n.* any of several types of instrument used to measure temperature on any of several temperature scales **ther·mo·met·ric** (θə:r·məmétrik), **ther·mo·mét·ri·cal** *adjs.* **ther·mom·e·try** (θərmɔmitri:) *n* (*THERMISTOR, *RESISTANCE THERMOMETER, *THERMOCOUPLE, *PYROMETER, *GAS THERMOMETER) [fr. Gk *thermē*, heat, *thermos*, hot + mētron, measure]
ther·mo·nu·cle·ar (θə:rmounú:kli:ər, θə:rmounjú:kli:ər) *adj.* relating to nuclear fusion
ther·mo·phil (θə:rməfil) **1.** *n.* a thermophile **2.** *adj.* thermophile **ther·mo·phile** (θə:rməfail) **1.** *n.* (*biol.*, e.g. of certain bacteria) an organism which thrives at relatively high temperatures (e.g. 50–55° C.) **2.** *adj.* (*Br.*) of or relating to a thermophile [THERMO- + Gk *philos*, dear, loving]
ther·mo·phys·i·cal *adj.* of the physical properties of materials at various temperatures
ther·mo·pile (θə:rməpail) *n.* an instrument, consisting of a number of thermocouples arranged in series, used for measuring incident radiant energy by the heating effect it produces, or as a portable generator of electric current (*SOLAR BATTERY)
ther·mo·plas·tic (θə:rmouplæstik) **1.** *adj.* becoming soft or plastic when heated and rigid again when cool **2.** *n.* a thermoplastic substance, e.g. polystyrene
Ther·mop·y·lae (θərmɔpəli:) a passage (wider now than in ancient times) between the Oeta Mtns and the marshy shore of Thessaly, Greece, 9 miles southeast of Lamia. Leonidas and 300 Spartans fought a rearguard action here to the death (480 B.C.) to delay the Persian army of Xerxes I during the Persian War
Ther·mos (θə:rməs) *n.* a doublewalled vessel used to keep substances at a temperature other than that of the surroundings. The space between the walls is evacuated to prevent heat transfer by conduction and convection, and the walls are silvered to reduce radiation [Trademark]
Thermos bottle a Thermos
ther·mo·set·ting (θə:rmousétiŋ) *adj.* of plastics and resins, which when once heated and compressed, resist further heat treatment
Thermos flask (esp. *Br.*) a Thermos
ther·mo·sol (θə:rməsɔl) *n.* process for dyeing synthetic fibers by utilizing heat for dispersal and penetration of dyestuffs
ther·mo·sphere (θə:rməsfiər) *n.* (*meteor.*) the region of the earth's atmosphere above the mesosphere about 50 mi. from the surface, including exosphere and part of ionosphere, at which temperature increases with height —**thermospheric** *adj. Cf* MESOSPHERE
ther·mo·sta·ble (θə:rmoustéib'l) *adj.* (*biochem.*) not losing its characteristic properties when heated (opp. THERMOLABILE)
ther·mo·stat (θə:rməstæt) *n.* a device used to maintain a constant temperature by cutting off the heat supply when this temperature is reached and restoring it when the temperature begins to fall as a result of cooling **ther·mo·stát·ic** *adj.* **ther·mo·stát·i·cal·ly** *adv.* [fr. THERMO- + Gk *statos*, standing]
ther·mo·tax·is (θə:rmoutæksis) *n.* (*biol.*) a reaction, esp. a locomotor reaction, of an organism to heat stimuli ‖ the regulation of body temperature [Mod. L. fr. Gk *thermē*, heat + *taxis*, arrangement]
ther·mo·trop·ic (θə:rmoutrɔpik) *adj.* of or showing thermotropism [fr. THERMO- + Gk *tropos*, a turning]
ther·mot·ro·pism (θə:rmɔtrəpizəm) *n.* (*bot.*) a tropism in plants in response to heat stimuli
the·sau·rus (θisɔ:rəs) *pl.* **the·sau·ri** (θisɔ:rai), **the·sau·rus·es** *n.* a useful literary collection or selection, esp. a book of synonyms and antonyms [L. fr. Gk *thēsauros*, treasure]
these *pl* of THIS
The·se·us (θi:si:əs, θi:sju:s) (*Gk mythol.*) hero and king of Athens. He is associated with Heracles and his campaign against the Amazons. Helped by Ariadne, daughter of King Minos, he killed the Minotaur in the labyrinth of Crete. He married Ariadne, but deserted her in Naxos
the·sis (θi:sis) *pl.* **the·ses** (θi:si:z) *n.* a proposition ‖ a reasoned argument, esp. in a written dissertation on a theme connected with the specialty by a candidate for any of certain academic degrees ‖ (*logic*) an affirmation (cf. ANTITHESIS, cf. HYPOTHESIS) ‖ (*prosody*) the unaccented part of a metrical foot (opp. ARSIS) [Gk = a placing]
Thes·pi·an (θéspi:ən) **1.** *adj.* of dramatic art ‖ of Thespis **2.** *n.* (*rhet.*) an actor ‖ (*hist.*) a native or inhabitant of Thespiae, a town of ancient Greece [after THESPIS]
Thes·pis (θéspis) (6th c. B.C.) Greek poet who won a prize for tragedy at Athens (534 B.C.). He is considered the founder of Greek tragedy
Thes·sa·lo·ni·ans, Epistles to the (θesəlóuni:ənz) the 13th and 14th books of the New Testament, almost certainly written (c. 51) by St Paul to the Church at Thessaloniki. They condemn false ideas that the second coming of Christ is at hand
Thes·sa·lon·i·ki (θesəlɔnikai) *SALONICA
Thes·sa·ly (θésəli:) a region of N. Greece consisting of plains surrounded by mountains: Ossa and Pelion on the Aegean coast (east), Olympus (north), Pindus (west), Oeta (south). It includes the Vale of Tempe. It was famous in antiquity for its cavalry. It was conquered by Macedon (4th c. B.C.) and became part of the Roman Empire (146 B.C.), of Turkey (1393) and of Greece (1881)
the·ta (θéitə, θi:tə) *n.* the eighth letter (θ, ϑ = th) of the Greek alphabet [Gk *thēta*]
theta pinch quick-pulsed compression of a magnetic field around ionized gas (plasma), used to control fusion
theta wave (*physiol.*) a brain wave pattern of 4 to 8 Hz with voltage greater than in alpha waves, which occurs in many brain regions, esp the hippocampus *Cf* ALPHA WAVE, DELTA WAVE
the·ur·gic (θi:ə:rdʒik) *adj.* of or relating to theurgy **the·ur·gi·cal** *adj.*
the·ur·gist (θi:ə:rdʒist) *n.* a person who practices theurgy
the·ur·gy (θi:ərdʒi:) *n.* divine intervention in nature or in human affairs, e.g. in a miracle ‖ the power possessed by a human being to secure or prevent such divine action, esp. the magical power which certain Neoplatonists believed might be acquired by long training, self-purification and esoteric learning and practices [fr. L. *theurgia* fr. Gk]
thew (θju:) *n.* (*rhet.*, esp. *pl.*) muscle, strength [fr. O.E. *thēaw*, custom]
they (ðei) *pron., 3rd person pl., nominative case* two or more persons, animals or things already mentioned ‖ (*pop.*) people or a group of people generally, *they say it will be a hard winter* [M.E. *thei* fr. O.N. *their*]
they'd (ðeid) *contr.* of THEY HAD, THEY WOULD
they'll (ðeil) *contr.* of THEY WILL, THEY SHALL
they're (ðɛər, ðéiər) *contr.* of THEY ARE
they've (ðeiv) *contr.* of THEY HAVE
thi·a·min (θáiəmin) *n.* thiamine
thi·a·mine (θáiəmi:n, θáiəmin) *n.* vitamin B_1 (*DIET), the antineuritic member of the vitamin B complex [fr. Gk *theion*, sulfur + AMINE]
thi·a·zine (θáiəzi:n) *n.* any of a class of compounds having a ring comprised of an atom of sulfur, an atom of nitrogen and four atoms of carbon ‖ a derivative of one of these compounds [fr. Gk *theion*, sulfur + AZINE]
thi·a·zole (θáiəzoul) *n.* a colorless liquid, C_3H_3NS, resembling pyridine ‖ any of its derivatives, used in dyes [fr. Gk *theion*, sulfur + AZOLE]
thick (θik) **1.** *adj.* of relatively great depth from one surface to its opposite surface ‖ large in diameter, *a thick log* ‖ broad, *a thick line* ‖ dense, closely massed together, *thick underbrush* ‖ (of the atmosphere in a room) stuffy ‖ viscous, *a thick syrup* ‖ measured between opposite surfaces, *three inches thick* ‖ (of speech) hoarse and indistinct because the words are run together ‖ (of regional or foreign accent) strongly marked ‖ (*pop.*) slow to understand ‖ (*pop.*) intimately friendly **a bit thick** (*Br., pop.*) unreasonable, *he thought it a bit thick that he was not allowed to speak* **2.** *adv.* thickly ‖ in close succession, *the questions came thick on one another* **to lay it on thick** to exaggerate ‖ to flatter grossly **3.** *n.* the most intense, crowded part, *the thick of the fray* and king of Athens. He is associated with Heracles and his campaign against the Amazons. Helped by Ariadne, daughter of King Minos, he killed the Minotaur in the labyrinth of Crete. He married Ariadne, but deserted her in Naxos

through thick and thin through all circumstances, favorable and unfavorable **thick·en** *v.t.* to make thick, *to thicken a sauce* ‖ *v.i.* to become thick or thicker, *the plot thickens* to become more involved, *the plot thickens* **thick·en·ing** *n.* the act of making or becoming thick ‖ an ingredient, e.g. flour, used to thicken ‖ the part where something becomes thicker [O.E. *thicce*]

thick·et (θíkit) *n.* a thick growth of small trees and undergrowth [O.E. *thicce*t]

thick film (*electr.*) a multimolecular film of ink used to cover and insulate circuit wiring

thick·head (θíkhed) *n.* (*pop.*) a stupid person **thick-héad·ed** *adj*

thick·ness (θíknis) *n.* the state or quality of being thick ‖ the smallest of the three linear dimensions (cf. LENGTH, cf. WIDTH) [O.E. *thicnes*]

thick-set (θikšét) *adj.* (of a person) short, but strong and compact in build ‖ planted or set close together

thick-skinned (θikskínd) *adj.* having a thick skin ‖ insensitive to insults, criticisms, reproaches etc.

thick-wit·ted (θikwítid) *adj.* [illegible] derstand

thief (θi:f) *pl.* **thieves** (θi:vz) *n.* a person who steals [O.E. *thēof*]

Thiers (tjer), Adolphe (1797-1877) French statesman and historian. A moderate liberal, he helped to bring about the revolution of 1830. He was prime minister in 1836 and 1840, but later became an opponent of the July Monarchy. His opposition to Napoleon III's coup d'état (1851) sent him into temporary exile. Thiers warned of the disastrous consequences of war with Prussia (1870). After the Franco-Prussian War he negotiated peace, suppressed the Commune and became president of France (1871-3). He is the author of 'History of the French Revolution' and 'History of the Consulate and the Empire'

Thiès (tjes) a commercial center (pop. 69,000) in W. Senegal, on the lower Niger: aluminum phosphates

thieve (θi:v) *pres. part.* **thiev·ing** *past* and *past part.* **thieved** *v.t.* to take by theft ‖ *v.i.* to practice theft **thiev·er·y** *n.* theft [O. E. *thēofian*]

thiev·ish (θí:vif) *adj.* characteristic of, or like, a thief

thigh (θai) *n.* the part of the human leg between the hip and the knee ‖ the corresponding part in the leg of a bird or quadruped ‖ the third section of the leg of an insect [O.E. *thēoh*]

thigh-bone (θáiboun) *n.* the bone of the leg extending from the hip to the knee. In man it is the longest and largest bone

thill (θil) *n.* the shaft of a cart or wagon, esp. one of a pair between which a draft animal is hitched [origin unknown]

thim·ble (θímb'l) *n.* a cap of metal etc. worn on the fingertip in sewing so that the needle can be pushed through a fabric without hurting the finger ‖ a short metal tube or sleeve ‖ (*naut.*) an iron ring with a grooved rim around which a rope is spliced to prevent it from chafing [O.E. *thymel*, thumbstall]

thim·ble·ber·ry (θímb'lberi) *pl.* **thim·ble·ber·ries** *n.* any of several American blackberries or raspberries bearing soft fruits shaped like sewing thimbles

thim·ble·ful (θímb'lful) *pl.* **thim·ble·fuls** *n.* a very small quantity of a liquid, generally alcoholic liquor

thim·ble·rig (θímb'lrig) **1.** *n.* a swindling game in which the operator has three thimble-shaped cups and a pea. He passes the cups over the pea and the victim bets that the pea will be found under a particular cup **2.** *v.t. pres part* **thim·ble·rig·ging** *past* and *past part* **thim·ble·rigged** (to cheat [illegible] **thim·ble·rig·ger** *n.* someone who operates the game

thin (θin) **1.** *adj. comp.* **thin·ner** *superl* **thin·nest** having little extent between opposite surfaces, *a thin sheet of paper* ‖ small in diameter, *a thin rope* ‖ (of a person or animal) of slender build, or noticeably lacking fat ‖ not closely [illegible] **density**, *a thin oil, a thin mist* ‖ of little strength or substance, *a thin voice, thin tea, a thin plot* lacking plausibility or persuasion, *a thin excuse* (*photog.* not [illegible] **thin time** a time of hardship or great discomfort, tedium, trouble etc. **2.** *adv.* thinly, *spread the butter thin* [O.E. *thynne*]

thin *pres. part.* **thin·ning** *past* and *past part* **thinned** *v.t.* to make thin ‖ (esp. with 'out') to reduce in number or mass ‖ *v.i.* to become thin [illegible]

thine (ðain) **1.** *possessive pron* that or those belonging to thee **2.** *possessive adj* (used in place of 'thy' before a noun beginning with a vowel or [illegible] [O.E. [illegible]]

thin-film solar cells (θinfilm) (*electr.*) inexpensive solar cells consisting of a thin, flexible metal or plastic material in which a thin film of a semiconductor material has been evaporated, used as a power source in spacecraft

thing [illegible] body, or object, esp. that which is no more than matter, i.e. not a living person or animal ‖ used in reference to a person, esp. in often condescending expressions of affection, pity etc., *she's a sweet thing, he's a wicked old thing* ‖ an action, *what would be the best thing to do next?* ‖ something not specifically named, *what's that thing he's carrying?* ‖ (*colloq.*) a uniquely personal activity, *he's doing his thing* ‖ something uttered or thought, *the president said some good things in his speech* ‖ (*pl.*) affairs or concerns, *the things of the mind* ‖ (*pl.*) belongings, clothes, utensils etc., *he left his things at the station* ‖ (*pl.*) circumstances in general, *things will get better* **a thing** (in negative expressions) anything, *he wouldn't do a thing to help us* **a thing or two** (with 'know' or 'tell') facts derived from thorough familiarity with a subject, *he knows a thing or two about economics* **first thing** at the earliest possible moment, *do it first thing in the* [illegible] to make a good thing of (to profit financially by **to see things** to have hallucinations **the thing** that which is appropriate or correct, *the thing to do in that case is rush to the hospital* ‖ that which is polite, *it is hardly the thing to leave an invitation unanswered* ‖ that which is fashionable, *stripes are the thing this season* [O.E.]

thing-a·ma·bob [illegible]

thing-um-a-jig (θíŋəmədʒig) *n.* (*pop.*) a substitute used when one doesn't know, or has momentarily forgotten, the proper name of something or (*Br.*) someone

think (θiŋk) *pres. part.* **think·ing** *past* and *past part* **thought** (θɔ:t) *v.t.* to engage in the process of arranging ideas in a pattern of relationships or of adding new ideas soon to be related to such a pattern ‖ to turn something over in the mind, e.g. to consider advantages and disadvantages, (with 'of') to have a specified opinion, *he doesn't think much of that play* ‖ (with 'of') to have consideration or concern, *think of your family first* ‖ (with 'of') to make provision, *you must think of the future* ‖ (with 'of' or 'about') to have in mind as a provisional plan, *we're thinking of going to the beach* ‖ to consider as a possible candidate, *we are thinking of John for that position* ‖ to remember, *can you think of his name?* ‖ *v.t.* to conceive in the mind, *to think strange thoughts* ‖ to have as a firm conviction, *I think she is lying* ‖ to have as a tentative opinion, *I think she might refuse* ‖ to work out by reasoning, *I can't think how the story will end* ‖ to determine by reflection, *I can't think what is best to do* ‖ to bring to a specified condition by mental activity, *to think oneself into a state of depression* ‖ (with 'to' + infinitive) to remember, or have the idea of doing [illegible] expected to have it, *he didn't think to lock the door* ‖ to be obsessed with the idea of, *he thinks and dreams flying* **to think aloud** to speak one's ideas as they occur **to think better of** to [illegible] reflection, *he was going to tell us the story but thought better of it* **to think nothing of** to take for granted (what would seem odd, hard etc.) to [illegible] *day* **to think out** (or **through**) to examine carefully (a problem) so as to reach a conclusion **to think over** [illegible] length **to think twice** to reflect with special [illegible] up (a plan, answer etc.) in the mind [O.E. *thencan, thencean*]

think [illegible]

think·er [illegible] one who thinks ‖ an opinion or judgment, *to my* [illegible] body of thought, *modern thinking* **2.** that thinks or can think

think·ing [illegible] researching and solving difficult, interdisci- plinary problems, the solutions to which often affect public policy *also* think factory

thin-lay·er chromatography (θinleiər) (*chem.*) an accurate, rapid process of color photography in which the absorbent medium is a thin layer of silica gel, aluminum, or cellulose on a glass plate *abbr.* TLC **—thin-layer chromatographic** *adj* Cf GAS-LIQUID CHROMATOGRAPHY

thin·ner (θínər) **1.** *adj* more thin **2.** *n.* a liquid used to make something (e.g. paint or printing [illegible]

thin-skinned (θinskind) *adj* having a thin skin ‖ unusually sensitive to criticism

thi·o acid (θáiou) an acid in which sulfur wholly or partly replaces oxygen [fr. Gk *theion*, sulfur]

thi·o·al·de·hyde (θaiouældəhaid) *n.* an aldehyde in which oxygen is replaced by sulfur

thi·o·bis·ma·zol [illegible] (*pharm.*) a drug used to treat fungus or roundworm infection

thi·o·cy·a·nate (θaiousaiəneit) *n.* a salt or ester of thiocyanic acid

thi·o·cy·an·ic acid (θaiousaiænik) a strong-smelling, unstable liquid acid, HSCN or HNCS, obtained by distilling a thiocyanate salt with dilute sulfuric acid

Thi·o·kol (θaiəkɔl) *n.* (*chem.*) any of a number of rubberlike polymers (RSXN), where R is a divalent organic radical and X varies usually between 2 and 4. They are very resistant to the [illegible] [Trademark]

thi·on·ic (θaiɔnik) *adj* relating to or containing sulfur [fr. Gk *theion*, sulfur]

Thi·o·nine (θáiəni:n, θaiənin) *n.* a violet dye, [illegible] [Trademark]

thi·o·rid·a·zine ($C_{21}H_{26}N_2S_2HCl$) (θaiouridəzi:n) *n.* (*pharm.*) a phenothiazine tranquilizer and antidepressant used in treating schizophrenia; marketed as Mellaril

thi·o·sul·fate, thi·o·sul·phate (θaiousʌlfeit) *n.* a salt or ester of thiosulfuric acid, used in photography, dyeing etc

Thomas, Dylan (1914-53), British poet, born in Wales. His books include '18 Poems' (1934) and 'Twenty-five Poems' (1936), in which the symbolism owes much to Freud and to the Bible, but where much is also highly personal and obscure, and 'Deaths and Entrances' (1946) on which his greatness ultimately rests: a handful of passionate lyrics, with love and death, childhood and the beauty of the world for their themes, and a diction, imagery and metrical skill which make many of them memorable. He also published various prose works among which are the 10 autobiographical stories, 'Portrait of the Artist as a Young Dog' (1940), and the radio script 'Under Milk Wood' (a poetic play, 1954). He also made a reputation as a reader of poetry, his own and others
